GUIDELINES FOR COMMERCIAL DEPARTMENT

As per Railway Board Gazette Notification No. 877 Dated 22.12.16, the following guidelines exist to deal with affected passengers at site of accident:

The Gazette of India

EXTRAORDINARY

PART II –Section 3 –Sub-section(i)

Published by Authority

No. 877 New Delhi, Thursday, December 22, 2016/PAUSA 1, 1938

MINISTRY OF RAILWAYS

(Railway Board)

NOTIFICATION

Letter No. 2015/TC-III/26/1 New Delhi, 22nd December,2016

GSR. 1165(E). In exercise of the powers conferred by section 129 of the Railways Act, 1989(24 of 1989), the Central Government hereby makes the following rules further to amend the Railway Accidents and Untoward Incidents (Compensation) Rules, 1990, namely:-

1. Short title and Commencement:-
   (1) These rules may be called the Railway Accidents and Untoward Incidents (Compensation) Amendment Rules, 2016.
   (2) They shall come into force on the 1st day of January, 2017.
2. In the Railway Accidents and Untoward Incidents (Compensation) Rules, 1990 (hereinafter referred to as the said rules) in rule 3-
   (i) In sub-rule(2), for the words "rupees four lakhs" the words "rupees eight lakhs" shall be substituted;
   (ii) In the second proviso to sub-rule(3) for the words "rupees eighty thousand", the words "rupees One lakh sixty thousand" shall be substituted".
3. In the said rules, in rule 4, for the words "rupees four lakhs" , the words "rupees eight lakhs" shall be submitted.
4. For the Schedule annexed to the said rules, the following Schedule shall be substituted, namely:-

SCHEDULE

(See Rule 3)

Amount of Compensation Payable in respect of Death and Injuries

Part-I	**Amount of compensation (in rupees)**
For Death	8,00,000

Part-II

1.	For loss of both hands or amputation at higher sites.	8,00,000
2.	For loss of hand and a foot	8,00,000
3.	For double amputation through leg or thigh or amputation through leg or thigh on one side and loss of other foot.	8,00,000
4.	For loss of sight to such an extent as to render the claimant unable to perform any work for which eye sight is essential.	8,00,000
5.	For very severe facial disfigurement.	8,00,000
6.	For absolute deafness.	8,00,000

Part-III

1.	For amputation through shoulder joint	7,20,000
2.	For amputation below shoulder with stump less than 8” from tip of acromion.	6,40,000
3.	For amputation from 8” from tip of acromion to less than 4½” below tip of olecranon.	5,60,000
4.	For loss of a hand or the thumb and four fingers of one hand or amputation from 4½” below space tip of olecranon.	4,80,000
5.	For loss of thumb.	2,40,000
6.	For loss of thumb and its metacarpal bone.	3,20,000
7.	For loss of four fingers of one hand.	4,00,000
8.	For loss of three fingers of one hand.	2,40,000
9.	For loss of two fingers of one hand.	1,60,000
10.	For loss of terminal phalanx of thumb.	1,60,000
11.	For amputation of both feet resulting in end bearing stumps.	7,20,000
12.	For amputation through both feet proximal to the metatarso-phalangeal joint.	6,40,000
13.	For loss of all toes of both feet through the metatarso-phalangeal joint.	3,20,000
14.	For loss of all toes of both feet proximal to proximal inter-phalangeal joint.	2,40,000
15.	For loss of all toes of both feet distal to the proximal inter-phalangeal joint.	1,60,000
16.	For amputation at hip.	7,20,000
17.	For amputation below hip with stump not exceeding 5” in length measured from tip of great trenchanter but not beyond middle thigh.	6,40,000
18.	For amputation below hip with stump exceeding 5” in	5,60,000

	length measured from tip of great trenchanter but not beyond middle thigh.	
19.	For amputation below middle thigh 3½" below knee.	4,80,000
20.	For amputation below knee with stump exceeding 3½" but not exceeding 5".	4,00,000
21.	Fracture of Spine with paraplegia.	4,00,000
22.	For amputation below knee with stump exceeding 5".	3,20,000
23.	For loss of one eye without complications the other being normal.	3,20,000
24.	For amputation of one foot resulting in end-bearing.	2,40,000
25.	For amputation of one foot proximal to the emetatarso-phelangeal joint.	2,40,000
26.	Fracture of Spine without paraplegia.	2,40,000
27.	For loss of vision of one eye without complications of disfigurement of eye ball, the other being normal.	2,40,000
28.	For loss of all toes of one foot through the metatarso-phalangeal joint.	1,60,000
29.	Fracture of Hip-joint.	1,60,000
30.	Fracture of Major Bone Femur Tibia Both limbs.	1,60,000
31.	Fracture of Bajor Bone Humerus Radius Both limbs.	1,20,000
32.	Fracture of Pelvis not involving joint.	80,000
33.	Fracture of Major Bone Femur Tibia one limb.	80,000
34.	Fracture of Major Bone Humerus Radius Ulna one limb.	64,000

[F.No.2015/TC-III/26/1]

RAVINESH KUMAR,
Joint Secretary

Note : The Principal rules were published in the Gazette of India, Extraordinary, Part-II Section 3, Sub-section(i) vide number G.S.R. 552(E), dated the 7th June, 1990 and subsequently amended vide number G.S.R. 592(E), dated the 22nd July, 1994 and G.S.R. 620(E), dated the 25th October, 1997.

Disaster Response – Role of NDMA & NDRF

2.0 National Disaster Management Authority (NDMA)

National Management Authority is apex body at the National Level to issue guidelines for Policy formation on Disaster Management and to suggest measures to deal with threatening disaster situation or disaster.

2.1 Constitution and role of NDMA

National Disaster Management Authorities is constituted under the DM act the apex body in the country to deal with Disaster Management holistically. Honourable Prime Minister is the ex-officio Chairperson of the Authority and presently Sh. M Shashidhar Reddy is the Vice Chairperson. The members have also been nominated and the total numbers of members is limited to nine to be nominated by the Chairperson. Vice Chairperson is of Cabinet rank and members are state rank minister.

NDMA is responsible for laying down the policies, plans and guidelines for Disaster Management for ensuring timely and effective response to disaster.

State and District have also been mandated to constitute State and District Disaster management authorities respectively on the line of NDMA.

2.2 Important Telephone numbers of NDMA:

2.3 Mutual Assistance in case of a disaster :

As per the Disaster Management Act, various ministries and departments under Government of India should join hands for mutual assistance in case of a disaster. Assistance from local government and non-government agencies is invariably required by the Railway Administration for prompt relief and rescue operation in case of disasters affecting Railways and therefore assistance of NDRF could be of great help to the Railways. The rail infrastructure is not in an island away from the civil areas (of District/State). In case of a disaster other than a train accident, the State Government as well as the Zonal Railways would, therefore, requisition the NDRF simultaneously (for the same disaster). Coordination amongst the affected agencies (many departments of the Central Government and the State) is very important before the help of NDRF is required.

2.4 National Disaster Response Force (NDRF) :

National Disaster Response Force is the Key Responders in any disaster situation. In serious situations, the resources of all NDRF battalions (18 teams per battalion), on an as required basis, will be concentrated in the shortest possible time in the disaster affected areas. Other important responders will be the Civil Defense, Home Guards and youth organizations such as NCC, NSS and NYKS. The deployment of the armed forces will also be organized on an as required basis. Establishment/raising of NDRF should progressively reduce deployment of the Armed Forces. However, Armed Forces would be deployed only when the situation is beyond the coping capacity of State Government and NDRF.

2.5 Location, Constitution and Functions :

These have been formed under the Disaster Management Act at 12 selected locations in the country for dealing with relief and rescue operations related to all types of disasters. These battalions have been made from Para military forces ie. CRPF, CISF, ITBP and BSF and have been placed in different parts of the country as shown in the list. DG, Civil Defense

under MHA is additionally looking after the work of NDRF at the Centre. Each Battalion has 06 companies comprising of 03 teams each. Team comprises of 45 men out of which 24 are for Search & Rescue and balance 21 for support functions. Short-listed & trained staff are on deputation in NDRF. These battalions are also equipped to handle NBC (Nuclear, Chemical and Biological) Disasters.

Details of NDRF organization and battalions are as under :

NDRF HQ

2.6 Coordination with NDRF:

Zonal railways should get in touch with NDRF offices at the nearby locations to have the first hand knowledge of the resources available with them and also to familiarize them with Railway related disaster situations and expose them to the issues relevant to the rescue and relief of passengers during railway accident. It has also been advised to associate NDRF in full scale exercise that is held once every year. There are no charges for availing the services of NDRF except the rail transportation which railways may provide at their cost for attending to rail disasters. Railways may also have to provide rail transportation logistics for transporting NDRF even in case of non-railway exigencies.

The Railway Board had earlier empowered DRMs to directly requisition the relevant NDRF battalion for relief and rescue operations depending on the gravity of situation so that their services could be made available expeditiously without any loss of time.

During the meeting between NDMA/NDRF and Railway Board officials held on 19th February 2013, it was decided that HQ NDRF will draw an annual calendar for Zone/Division-wise meeting between NDRF Battalion Commandant and Railway Safety Officials for better coordination and management during disasters/major train accidents and each NDRF battalion should carry out at least one or two mock exercises/ coordination meeting with each Zonal railway each year. The said calendar has been received from NDRF and same has already circulated to Zonal Railways.

During meeting held on 26th July 2010 between NDMA/NDRF and Railway authorities, it was decided that Railway would be associated in all future mock exercises being conducted by the NDMA and for which a copy of annual calendar of mock exercises will be provided by the NDMA and CSOs will coordinate Zonal Railways participation in such Mock exercises. Similarly, Railways will carry out mock exercises on train accident in presence of NDRF battalion Commandants.

3.1 Annual Review and Updation of Disaster Management Plan

Government of India
Ministry of Railways
(Railway Board)

No. 2009/Safety(DM)/6/14 New Delhi, Dt 09.07.2015

Chief Safety Officer
East Coast Railway

Sub : Annual review and updation of Disaster Management Plan.

Ref : Your office letter no. ECoR/SFY/DM/527 dated 16.06.2015

1. East Coast Railway has referred to Railway Board regarding the need for printing DM plan every year in light of the fact that not many changes are carried out in the instructions/ procedures indicated therein.
2. As per Disaster Management Act 2005 every Ministry or the department of Government of India has to review and updated their DM plan. The same instructions were envisaged in the DM plan of Ministry of Railways. Further the Act doesn't stipulate that the plan should be published every year, it only indicates that the plan needs to be reviewed and updated annually.
3. Board has reviewed these instructions and decided that :-
   (a) DM plan of the Zone/Division should be prepared in two parts.
   (b) The first part should contain the general information, duty list , role and responsibility of various department, guidelines issued by NDMA and Railway Board etc.
   (c) The second part should contain information about the important telephone numbers of the respective Zone/Division, contact details of Para military forces, State administration, hospitals, bus depots, fire service, NGOs, Earth moving equipment suppliers etc.
   (d) The first part of the DM plan should be reviewed and updated as and when fresh instructions were received from NDMA or Railway Board or any other Concerned organization. This part need not be published /printed every year.
   (e) Second part which generally consists of the contact details should be updated annually and the same should be circulated to all concerned. Corrections/Additions/Deletions to the first part may be incorporated in this as a correction slip.
   (f) Zonal Railways may decide to publish/print the First part whenever the necessity is felt.

The above instructions may please be followed during future review/updation of Disaster

Management plan.

-Sd-
(P.Srinivas)
Director(Safety-III)
Railway Board

Copy to- Chief Safety Officers of All Indian railways including
KRCL except ECoR for information and necessary action

3.2 Hiring of Helicopter / Aero plane at the time of severe accident.

(Copy of Rly. Board L.No. 2002/Safety-1/6/6 dt13.06.2004)

GM/DRM can hire helicopter/Aero plane to reach the site of accident, dispatch the rescue team to the site of accident and evacuate injured and dead from accident site. Copy of Rly. Board's letter no. 2002/Safety-1/6/6 dt. 30.06.04 is reproduced below. The list of Helicopter/Air ambulance is given in Appendices.

Zonal Railway has been delegated powers to requisition helicopter/ aero plane for expeditious action in the event of serious accidents vide Railway Board's letter under reference. The subject matter has been reviewed by the Board and the following revised powers are delegated to the Zonal Railways.

GMs/DRMs have been delegated the powers to requisition helicopter/ aero plane to reach the site of serious accident for rescue operation expeditiously. In addition, powers are also delegated to requisition air support to dispatch the rescue teams to the site of accident.

It is difficult to stipulate exactly the circumstances under which they may exercise the powers, it has been decided to leave this to the discretion of GMs/DRMs. However broadly they may cover the following type of cases.

(a) Where more than 10 casualties (deaths-cum-serious injuries) are feared and it is difficult for the officers to reach the site within reasonable time.

(b) Where heavy damage is caused to Railway installations in sensitive and tension fill areas (eg. Wreckage of track, bridges etc. through Bomb blast, other means sabotage etc.)

(c) Where public reaction in case of late arrival of senior officers at site is likely to be highly adverse. Normally, in case of an accident, only one helicopter should be requisitioned by a Zonal Railway, except when there is serious passenger train accident involving several casualties when it is essential for both the General Manager and the Divisional Railway Manager to reach the site of at once to satisfy the public and Press. However for dispatching the rescue teams to the site of accident, separate helicopter / aero plane may be requisitioned if so needed.

The GMs/DRMs may exercise the above powers personally and may not delegate the powers. Zonal Railways are further empowered to requisition helicopter/ aero plane to evacuate injured and dead in the event of serious accident. GMS's may personally exercise these powers and may not delegate these further.

The above instructions on the subject supersede all the previous instructions issued via above referred letters. This issue with the concurrence of the Finance Directorate of the Ministry of Railways.

3.3 Requisition of Indian Air Force Aircrafts/Helicopter :

(Copy of the Railway Board's letter no. 2002/Safety-1/6 Dated 05.12.2006)

Sub: Requisitioning of Indian Air Force Aircrafts/Helicopter by Zonal Railways in case of serious accidents/natural calamities.

Doubts have been raised from time to time by the Zonal Railways regarding instructions on the above matter. The extracts of Air Force instructions no. 9/83 regarding Regulations Governing Flights and Airlifts IAF Aircraft within Indian Territory is reproduced as under:

Para 9(a) The use of IAF aircraft of civil agencies may be authorized by the Chief of the Air Staff on payment at rates which will be fixed by the Ministry of Finance (Defence). Such Flights maybe provided on written demand for work like aerial photography, survey and other purpose, survey of air routes, carriage of mail, drop of supplies, carriage of urgently required stores, leaflet droppings, relief and reconnaissance flights, carriages of Para military police force etc. " Such flights as errand of mercy, on payment at chartered rate without detriment of Defence requirements, may also be provided for evacuation of seriously sick or injured civilians from inaccessible areas at the written request of the State Governments, Union Territory Administration and other Central Ministries/Departments, as a life saving measures on an undertaking by such authorities, it is neither by them nor any other means of civil air/ surface transport is available for such evacuation and the evacuation by the IAF will be at their risk and cost." The Ministry of Defence may sanction on payment, urgent movement of civilian Government servants and for the State Government provided aircraft are available without prejudice to service requirements.

1 Para 9(d) : Station commanders of and above the rank of Wing Commander may authorized special flights of aircraft under their control to meet written request from Central Ministries/Departments /State Governments/Administration of Union Territories for assistance in any grave emergency of natural catastrophe. They will immediately advise concerned Command Headquarters. Such flights are to be regularized under the authority of the C-In-C Command /Group in due course.

Attention is also invited to Railway Board letter of even number dated 13/15.06.2004 by which GMs/DRMs have been delegated power to requisition helicopter/aero plane even from

private parties (copy enclosed) to reach the site of serious accident for rescue operation expeditiously and to dispatch the rescue teams to the site of accidents.

Zonal Railways may take note of the above standing instructions and establish coordination with the appropriate Air Force authorities.

Please acknowledge receipt.

Director/Safety Railway Board

3.4 Coordination with NDRF Battalions :

GOVERNMENT OF INDIA
MINISTRY OF RAILWAYS
(RAILWAY BOARD)

No. 2003/SAFETY/DM/6/3 New Delhi, dated 02.08.2010

The Chief Safety Officers, All Indian Railways

Sub: Coordination with NDRF Battalions

A meeting was held between the officers of Railway Board and Shri K.M.Singh Hon'ble Member NDMA on 26.07.10 Amongst others, DG/NDRF, senior Officials of MHA etc. attended the meeting.

The main focus on the discussion was pertaining to effective use of NDRF battalions to assist railway efforts in rescue, relief and restoration consequent to a major train accident. DG/NDRF brought out their preparations and training is hampered by the fact that they have limited knowledge of the railway facilities available, as also of the features of the rolling stock used by the Railways.

A decision was taken to educate the NDRF officers and men by the Zonal Railways/ Divisions on the following items:-

ARMV/ARTs-

Commandant/NDRF located closed to the Divisional Headquarters may be called along with a few of his personnel to see the ARMV and ART which may be stabled at a convenient location for the duration of this demonstration. The equipment inside the ARMV/ ART may be shown. Features of different type of coaches (AC and Non AC coaches), other freight rolling stock, specially BTPNs and TPs used to carry inflammable products and dangerous Chemicals.

Regular Coordination meetings may be held between the NDRF Battalion Commandant and the CSOs and the representative of the Division(DRM's or in his absence the ADRM/ Sr.DSO). The first meeting be held within the next two months from now, thereafter regular meetings be held once every 6 months.

During the above demonstration, NDRF personnel may be shown the emergency exit window in the coaches, safety valves in the wagons (BTPNs & TPs) and the other structural details etc. equipment available in the ART/ARMVs, specially cold cutting equipment in the ARMV and MFDs etc. may be demonstrated.

The latest update list of telephone numbers of officers of NDMA and NDRF was made available during this meeting. This is being advised to the Zonal Railways in Annexure.

A report on the action taken on the above may kindly be advised.

3.5 <u>Enhancement of Ex-gratia.</u>

MINISTRY OF RAILWAYS
(Railway Board)
NOTIFICATION

Letter No. 2015/TC-III/26/1 New Delhi, 22nd December, 2016

GSR. 1165(E). In exercise of the powers conferred by section 129 of the Railways Act,1989(24 of 1989), the Central Government hereby makes the following rules further to amend the Railway Accidents and Untoward Incidents (Compensation) Rules, 1990, namely:-

1. **<u>Short title and Commencement</u>:-**
   (1) These rules may be called the Railway Accidents and Untoward Incidents (Compensation) Amendment Rules, 2016.
   (2) They shall come into force on the 1st day of January, 2017.
2. In the Railway Accidents and Untoward Incidents (Compensation) Rules, 1990 (hereinafter referred to as the said rules) in rule 3,-
   (i) In sub-rule(2), for the words "rupees four lakhs" the words "rupees eight lakhs" shall be substituted;
   (ii) In the second proviso to sub-rule(3) for the words "rupees eighty thousand", the words "rupees One lakh sixty thousand" shall be substituted".
3. In the said rules, in rule 4, for the words "rupees four lakhs" , the words "rupees eight lakhs" shall be submitted.
4. For the Schedule annexed to the said rules, the following Schedule shall be substituted, namely :-

SCHEDULE

(See Rule 3)

Amount of Compensation Payable in respect of Death and Injuries

Part-I		**Amount of compensation** (in rupees)
For Death		8,00,000
Part-II		
1.	For loss of both hands or amputation at higher sites	8,00,000
2.	For loss of hand and a foot	8,00,000
3.	For double amputation through leg or thigh or amputation through leg or thigh on one side and loss of other foot.	8,00,000
4.	For loss of sight to such an extent as to render the claimant unable to perform any work for which eye sight is essential.	8,00,000
5.	For very severe facial disfigurement.	8,00,000
6.	For absolute deafness.	8,00,000
Part-III		
1.	For amputation through shoulder joint	7,20,000
2.	For amputation below shoulder with stump less than 8" from tip of acromion.	6,40,000
3.	For amputation from 8" from tip of acromion to less than 4 ½" below tip of olecranon.	5,60,000
4.	For loss of a hand or the thumb and four fingers of one hand or amputation from 4 ½" below space tip of olecranon.	4,80,000
5.	For loss of thumb.	2,40,000
6.	For loss of thumb and its metacarpal bone.	3,20,000
7.	For loss of four fingers of one hand.	4,00,000
8.	For loss of three fingers of one hand.	2,40,000
9.	For loss of two fingers of one hand.	1,60,000
10.	For loss of terminal phalanx of thumb.	1,60,000
11.	For amputation of both feet resulting in end bearing stumps.	7,20,000
12.	For amputation through both feet proximal to the metatarso-phalangeal joint.	6,40,000
13.	For loss of all toes of both feet through the metatarso-phalangeal joint.	3,20,000
14.	For loss of all toes of both feet proximal to proximal inter-phalangeal joint.	2,40,000
15.	For loss of all toes of both feet distal to the proximal inter-phalangeal joint.	1,60,000

16.	For amputation at hip.	7,20,000
17.	For amputation below hip with stump not exceeding 5" in length measured from tip of great trenchanter but not beyond middle thigh.	6,40,000
18.	For amputation below hip with stump exceeding 5" in length measured from tip of great trenchanter but not beyond middle thigh.	5,60,000
19.	For amputation below middle thigh 3 ½" below knee.	4,80,000
20.	For amputation below knee with stump exceeding 3 ½" but not exceeding 5".	4,00,000
21.	Fracture of Spine with paraplegia.	4,00,000
22.	For amputation below knee with stump exceeding 5".	3,20,000
23.	For loss of one eye without complications the other being normal.	3,20,000
24.	For amputation of one foot resulting in end-bearing.	2,40,000
25.	For amputation of one foot proximal to the emetatarso-phelangeal joint.	2,40,000
26.	Fracture of Spine without paraplegia.	2,40,000
27.	For loss of vision of one eye without complications of disfigurement of eye ball, the other being normal.	2,40,000
28.	For loss of all toes of one foot through the metatarso-phalangeal joint.	1,60,000
29.	Fracture of Hip-joint.	1,60,000
30.	Fracture of Major Bone Femur Tibia Both limbs.	1,60,000
31.	Fracture of Bajor Bone Humerus Radius Both limbs.	1,20,000
32.	Fracture of Pelvis not involving joint.	80,000
33.	Fracture of Major Bone Femur Tibia one limb.	80,000
34.	Fracture of Major Bone Humerus Radius Ulna one limb.	64,000

3.6 MOU Between Railway & Rajasthan Government.

Memorandum of Understanding
For
Disaster Management at the time of a rail accident
Between

- Indian Medical Association State Branch Rajasthan
- All Rajasthan Private Doctors Federation
- Medical Practitioner Society Jaipur
- Private Hospitals & Nursing Home Society, Jaipur

And
Indian Railways Jaipur

Recognizing the need for providing speedy medical care to the patients at the site of rail accidents the doctors and their associations and the Indian Railways (Hereinafter referred to as parties) have reaffirmed the following understandings.

1. Drawing force for the strategies

The medical Association is a conglomerate of trained medical personnel in various specialties providing comprehensive medical management to needy patients in both Government and Private set up in the state of Rajasthan. They are also involved in variety of charitable activities to provide succor to the needy patients all through the year.

The parties have recognized the need to provide quick and comprehensive medical aid at the desired site. Recognizing the urgency of speed to provide medical help, partnership would add to the efforts already in place for any disaster management.

2. Areas for cooperation

The parties wish to cooperate in the following areas:

1. The parties will work together to make available medical care at the disaster site.
2. The parties would work together to create awareness and training of medical and paramedical personnel towards speedy management at the site of disaster.
3. The parties would also work closely to sensitize the General public regarding the do's and dont's at the time of such disasters.
4. Implementation of MOU.

3. The parties wish to act under the following terms:

1. Railway will provide intermediate information to members mentioned in the list provided for the same whenever such a disaster occurs.
2. Railways will provide training to selected medical and paramedical staff in the disaster relief management.
3. Both the parties will bear the responsibility for making available quick

transport of medical and paramedical staff and medical resources required at the disaster site.

4. Proper utilization of the (ARMV) Accident Medical Relief Medical van of the North Western Railway at the time of Railway accident.
5. There would be a provision of a mock trial at least once in a year to keep the disaster management resources in peak efficiency state.
6. Independent audit of the response time during such mock trials and actual accidents if any would be discussed in a conference to be held once in a year where representative from parties would try and rectify the flaws to achieve quick response to the challenging situation in future.
7. All parties to this MOU agree to participate in any inspection/ audit of their operations by any external agency, which may be deemed necessary to achieve the goal of this MOU.
   This audit may suggest certain reformative measures for future..

4. Confidentiality of Information

The information relating to "Memorandum of Understandings" circulated among the "Parties" marked as "Confidential" shall be strictly kept confidential and shall not be disclosed to any third party other than to carry out the provisions of this MOU.

5. General

The parties will discuss and co-operate on any other miscellaneous matters that may arise time to time which fall within the joint and individual objectives of their respective organization.

6. Termination

Both parties shall have the right, at their sole discretion to come out of MOU but after mutual discussion with each other Such MOU can be modified suitably after the receipt written notification by any of the party.

7. Validity

The memorandum shall become effective with immediate effect and is subject to renewal after every two years in general. In case of no change desired, the MOU shall remain valid indefinitely.

(Ref. Letter No. CD/APD/03/1028 Dated-18.12.2003)

3.7 MOU Between Railway & MP Government.

Directorate of Health Service
Madhya Pradesh

No: 111/C-4/07/1533 Bhopal, 27.02.2007

To,

1. All Regional Joint Directors, Health Service, Madhya Pradesh.
2. All Chief Medical & Health officers, Madhya Pradesh
3. All Civil Surgeons, District Hospital, Madhya Pradesh.
4. All Superintendents, Civil Hospitals, Madhya Pradesh

Sub : Assistance during passenger train railway accident at site.

You all are hereby directed to take the following measures in case of Passenger train railway accident.

1. On receiving the information of train accident a team of doctors should be immediately sent to the accident site to provide medical relief and rescue Assistance at the site.
2. As many as possible ambulances should be sent to accident site and needy Victims shifted either to District Hospital/Civil hospitals or nearby equipped Nursing Home/Hospital for the purpose of life and limb saving procedures.
3. As many beds as possible should be provided in District Hospital/Civil Hospital under your control to mitigate the suffering humanity.
4. All life saving drugs including compatible blood transfusion should be provided.
5. Assistance in performing post mortem, if authorized to do so.
6. Storage of as many dead bodies as possible in mortuary.
7. For the services rendered, suitable monetary compensation at prevailing existing rates will be done.

Please arrange to disseminate the above directions to all the staff working under control to come forward during railway accident and render all assistance without waiting for any further requisition or order.`

3.8 Role/duties of Safety Officers at an accident site

Government of India
Ministry of Railways
(Railway Board)

No. 2017/Safety(DM)/Misc. New Delhi, Dt. 30.01.2017

Chief Safety Officers
All Indian Railways and KRCL

Sub: Role/Duties of Safety Officers at an accident site.

Duties and responsibilities of safety officers of division and of headquarters are well defined in the accident manual and Disaster Management Plan of the Railways. In the recent accidents it was observed that the relevant information about the accident was not forthcoming in a systematic manner and in the process vital information is lost. It was also noted that at the accident site event log was not maintained and Head Quarter emergency cell was not updating Railway Board periodically.

In view of the above a broad checklist for safety officers has been prepared and the same is annexed to this letter. This checklist, however, in no way circumvents the duties and role defined for the officers in the Accident Manual and Disaster Management plan of the Railways. Chief Safety Officers shall ensure that Sr.DSOs carry out their responsibility within a reasonable time. Chief Safety Officers shall be in constant touch and update Railway Board emergency control room. The checklist may please be circulated to the divisional officers and ensure that they comply with the instructions.

Enclosure: One

-Sd-
(Vinod Kumar)
ED/Safety(Coordination)
Railway Board

Check list for the Divisional Safety Officers Subsequent to an Accident

Immediately rush to the accident site by the first available means along with safety counselors.
Speak to Guard/Loco Pilot to understand the sequence of events and assess the extent of damages, the exact number of vehicles affected with their stenciled numbers. Also Guard may be asked to take pictures with their mobiles and sent them through whatsapp.
Arrange to rush the relief teams available with the Railways.
Check whether Station Masters on adjacent stations, Control and Medical staff have requisitioned for local medical help and ambulances.
Seek assistance of NDRF and other Government/Non-government organizations if required.
Assess the site conditions and if needed order for additional rescue teams.
Establish a Unified Command Centre (UCC) and arrange to man it by a safety counselor.
Arrange to establish telephonic communication at the site.
Preserve all clues and evidences regarding probable cause of accident.
Arrange to record joint observations/measurements at the site by the senior subordinates.
Should check for any speed restriction at the location and any abnormality reported by previous trains crew.
Arrange to maintain log of events at the site and relay to divisional emergency cell at regular intervals.
Relay Prima Facie cause in consultation with officer in-charge within a reasonable time.
Ensure that in UCC details of passengers admitted is maintained Hospital wise.
Relay probable restoration time in consultation with officer in-charge within a reasonable time.
Arrange to create Accident ID in SIMS and update all the relevant fields at regular intervals.
Arrange for live feed through VSAT, collect a erial pictures of the accident and upload the photos /video in SIMS.

Chief Safety Officer shall ensure the following –

Be in constant touch with divisional officers and Railway Board Emergency Cell. Shall ensure that above actions are carried out by divisional safety officers.
To seek for additional assistance from adjacent Railways and other Government/Non – Government agencies if needed .
Ensure that HQs emergency cell is manned by a Dy.CSO.
Ensure that all the details of the accident are conveyed to RB emergency cell hourly
Ensure that all the relevant details are filled up in the SIMS

3.9 Mock Drills for ART/ARMV and Full Scale Disaster management exercises.

Government of India
Ministry of Railways
(Railway Board)

No. 2010/Safety(DM)/6/23 New Delhi, Dated 09.03.2017

General Managers
All Indian Railways and
CMD/KRCL

Sub: Mock Drills for ART/ARMV and Full Scale Disaster management exercises.

Accident manual of Zonal Railways stipulated that mock drills should be conducted for ART/ARMV to check their readiness so that in case of an accident ART/ARMV staff performs like a well rehearsed team. Board has noticed that the periodicity prescribed in the accident manual is varying over Zonal Railways and the methodology is also not uniform.

Based on the recommendations of High Level Committee on Disaster Management (Vide recommendation No. 106) each division should conduct one full scale disaster management exercise on the similar line as army exercises once in a year. Likewise, mock drills for ART/ARMVs have to be conducted on a regular basis.

Comptroller and Auditor General report no. 13 of 2016 (Railways) Chapter no. 6 on Disaster Management was critical of Railways for not conducting mock drills as per the prescribed periodicity. To have uniformity over Indian Railways and ensure that all the relevant aspects re covered in the mock drills and full scale disaster management exercises, detailed instructions are prepared by the Board and these instructions are annexed to this letter.

Zonal Railways shall ensure that the mock drills and full scale disaster management exercises are conducted in the prescribed periodicity as per the procedure annexed. Details of drills may please be reported to Board in the Safety PCDO as per Annexure-XIII.

-Sd
(Vinod Kumar)
ED/Safety(Coordination)
Railway Board

Instructions on Mock Drill and Full Scale Disaster Management Exercises

1.0 Aim and Objectives:

Mock Drills provide virtually the only means, short of an actual incident, of measuring the state of readiness and of testing the effectiveness of an emergency response plan. The real purpose of mock drill is to take all Railway Staff who have specific duties to perform in case of an accident, to practice their duties regularly and test check the equipment so that in real emergency they perform their duties like a well rehearsed team. The Aim and objective of Mock drill is to:

- To evaluate response.
- To evaluate readiness of all stake holders.
- To improve coordination within departments.

- To identify the efficacy of SOPs.
- To revise SOPs for enhanced coordination.
- To identify planning gaps.
- To increase emergency preparedness of staff members.
- To enhance the ability to respond faster.

2.0 Periodicity:

Mock drills have to be conducted once in every quarter either during day or night. It is desirable not to repeat the drill again and again at the same time or section. However if ART/ ARMV is turned out on account of accident in that quarter the periodicity may be reckoned from that date. At a particular station of both ART/ARMV are stationed, alternatively ART and ARMV needs to be turned out quarterly. Full scale disaster management exercise has to be conducted in a division once in a year as recommended by High Power Committee on Disaster Management.

3.0 Responsibility for conducting the Mock drills and full scale disaster management exercises:

To have an element of surprise mock drills shall be ordered by the DRM and drills shall be conducted under the direct supervision of Sr.DSO/DSO. Secrecy and confidentiality shall be maintained to extent possible. Sr.DSO/DSO shall be responsible to conduct full scale Disaster Management Exercises.

4.0 Who has to associate with these exercises :

Doctors, paramedics and the usual break down staff should travel by these trains exactly as they would have in case of an accident. Railway Ambulance should also be turned out. The officers and staff of such other departments who have specific duties to perform in case of accidents but may not have to accompany such trains should also participate. District administration to the extent required also has to associate with these drills.

5.0 Activities to be monitored during Mock drill

- Turning out of relief trains within prescribed time.
- Speed of specials.
- Attendance of staff.
- Whether correct information given to control particularly in respect of nature of assistance required.
- Action taken to stop any approaching train if any.
- Medical assistance available mustered in full strength and calling out of local ambulances.
- Time at which first ambulance reached the spot.
- Response of the local administration like police, fire brigade etc.
- Time taken to set up the field telephone.
- Staff conversance in usage of equipment.
- Working of select equipment shall be test checked.
- Logging of events.
- Mock drill shall be called off by Sr.DSO/DSO after consulting DRM.

6.0 Procedure for full scale Disaster Management Exercises

Full scale disaster management exercise is a planned activity to check the complete preparedness, response and functioning of all stake holders in case of disaster. Station at which these exercises are planned should be selected in due consultation with DRM and Operating officers to ensure least disturbance to train operations. In these exercises in addition to the activities to be carried out in mock drill indicated in para 5.0, the following shall be carried out.

- Accident like situation has to be created like one coach over another so that rescue operations can be similar to an accident site.
- All the stake holders have to be involved in the rescue and relief operations.
- All the activities prescribed in the Accident Manual/Disaster Management Plan regarding

setting up of UCC, ICC, CAC etc. have to be carried out.

- Railway staff can double up as injured passengers with various types of injuries and handling of such passengers by rescue staff needs to be observed / recorded.
- Time taken to set up rescue equipment and time taken to rescue first person should be recorded.
- All the equipment in ARMV/ ART have to be physically tested for their performance and endurance.
- All the activities need to be video graphed for post analysis and also for training purpose.

7.0 Reporting and follow up action:

Detailed report of the mock drill and full scale disaster management exercise shall be prepared by Sr.DSO/ DSO duly indicating attendance of nominated staff from each branch, non attender to be reported by name, deficiencies in the equipment, gap in the disaster management plan and SOPs etc. The report should also include any improvement or otherwise in the deficiencies observed in the previous drills. Sr.DSO/DSO shall monitor the action taken on the deficiencies by the respective departments.

3.10 <u>Non involvement of passenger Train during the course of Mock Drill</u>

भारत सरकार
(GOVERNMENT OF INDIA)
रेल मंत्रालय
(MINISTRY OF RAILWAYS)
रेलवे बोर्ड
(RAILWAY BOARD)

No. 2010/Safety(DM)/6/23 New Delhi, Date 07.06.2017

General Manager/WCR
All Indian Railways and
CMD/KRCL

Sub: Conducting of mock Drills.

Ref: Railway Board letter of even No. dated 09.03.2017

Detailed instructions were issued to Zonal Railways for conducting of mock drills of ART/ARMV and full scale Disaster Management exercises vide letter under reference.

In the recent mock drills over Zonal Railways, Board has observed that initial message of the accident was about involvement of a passenger train. This is causing confusion/panic situation and bad publicity in electronic and social media. In view of the above, Zonal Railways are advised to avoid situation of passenger train derailment as a mock drill. All concerned may please be advised accordingly.

3.11 Assistance of NDMA / NDRF to handle Railway related disasters

GOVERNMENT OF INDIA
MINISTRY OF RAILWAYS
(RAILWAY BOARD)

No. 2003/Safety(DM)/6/3 New Delhi Dated : 30.08.2017

Chief Safety Officer
North frontier Railway

Sub : Assistance of NDMA / NDRF to handle Railway related disasters
Ref. : Your office letter no. T/308/DM/2/2014/16 dated 16.08.2017.

Vide letter under reference, North frontier railway has requested Railway Board to seek assistance from NDMA for arrangement of motorboats in Katihar Division for restoration of breach/wash outs due to flood.

Based on the above communication Railway Board had sort assistance from NDRF headquarters and motorboats were arranged from 9th battalion of NDRF. However it is to clarify that as per the prevailing instructions, DRM and CSO can directly seek assistance from the NDRF. These instructions were issued vide railway Board letter no. 2003/Safety (DM)/6/3, dated 05.08.2010

Para 5.2 of Disaster Management Plan of Ministry of railway issued in April 2016, indicates that DRMs/CSOs have been empowered to directly requisite the relevant NDRF battalion for relief and rescue operations depending upon the gravity of the situation so that their services could be made available expeditiously without any loss of time.

Board instructions in this regard may please be incorporated in Disaster Management Plan of NF Railway and all concerned may please be advised accordingly.

Sub: Revision and Standardization of Observation/Measurement Proforma for Accident Investigation/Inquiry.

Ref.: 1. RDSO letter No. CT/Safety dated 08.06.2018.
2. CCRS's letter No. M.15013/1/2017-18 T.W. (Pt.II) dated 07.06.2018

A revised Observation/Measurement Proforma for various parameters related to track and rolling stock for Accident Investigation / Inquiry has been prepared by RDSO in consultation with Commission of Railway Safety. Board (CRB) has approved the proforma for uniform adoption over Indian Railways for CRS Inquiry as well as Joint / Departmental Inquiry of the accidents. The approved proforma (total 34 pages) is enclosed herewith.

This is for kind information and necessary action please.

-Sd-
(Pankaj Kumar)
Director (Safety) – IV
Railway Board
Ph: 030-43574, 011-23070944
Mob. : 9910487540

Copy to :

1. DG/RDSO, Lucknow and Commission of Railway Safety, Lucknow for kind information in connection with letter under reference.

2. Chief Safety Officers, All Zonal Railways.

General Guidelines:

1. Careful observation of clues and a comprehensive record thereof is vital for accident enquiry. In addition, a comprehensive record of track and rolling stock parameters and operating features is required for investigation of derailments.

2. There are two broad categories of derailment.

   Sudden derailment, caused by wheel set jumping of the rails. Such a derailment indicates that the derailing forces were high enough to suddenly force the wheel off the rail. These are typically caused by failure of vehicle/ track components, obstruction on track, entanglement of hanging parts of rolling stock etc. These derailments are characterized by a short mark on rail table between Point of Mount and Point of Drop. In some cases the Point of Mount may even be absent.

   Derailment by flange climbing*, caused* by wheel mounting the rail in a relatively gradual manner. It indicates that the derailing forces were powerful enough to overcome the normal stabilizing forces, yet not sufficient to cause a sudden derailment. Such derailments are characterized by a longer mark on the rail table between Point of Mount and Point of Drop. Track and rolling stock parameters and operating features influence the rail-wheel interaction forces and, hence, their complete record and a comprehensive analysis is required to arrive at the mechanism of derailment. Cause and consequence of derailment are required to be differentiated through this comprehensive analysis.

3. Locating and examining the wheel mounting mark(s) at the initial point of derailment is very important for identifying the category of derailment. Precise measurements and critical and detailed examination of the wheel mounting marks should be made e.g. their length, strong or faint, broken or continuous, single or multiple, etc. Photographs should be taken of such marks, not only on the rail, but also on the fastenings, sleepers and ballast.

4. Derailment proneness increases with increased Lateral wheel force, reduced Vertical wheel load (Off loading) and increased Positive Angularity of wheel. Derailment proneness becomes substantially higher in case of axle moving with a persistently positive angularity. Track and rolling stock parameters and operating features should be critically analysed for their contribution towards these causes. In case of derailments in curve, proper functioning of Bogie rotation system to ensure undue angularity needs close examination. Contribution of track twist and spring defects and twist in bogie frame/ vehicle under frame to derailments caused by wheel Off loading needs to be analysed. In case of derailments at high speed, parameters affecting vehicle oscillation and damping thereof needs a close analysis.

5. While analysing the mechanism of derailment, relative contribution of track and rolling stock parameters to the rail-wheel interaction forces needs a comprehensive analysis. Reference should be made to the safety limits/ Maintenance limits specified in IRPWM/ IRCA Rules/ Maintenance Manuals.

6. Proforma for measurement of locomotive, wagon, and carriage are attached as annexure-A, B, C and D respectively for recording the details. The joint measurement to be submitted by senior supervisors shall not be completed till all the measurement of rolling stock and track as

per enclosed proforma have been recorded. Only completed joint measurement w.r.t. rolling stock and track shall become a document to be relied upon by the enquiry committee for drawing conclusion regarding cause of accident.

7. No enquiry shall be completed before the complete measurement of rolling stock and track is available and made part of the enquiry report. Enquiry Committee may get additional measurements done as per requirement of the derailment case.

8. The photographs of the concerned sections of track and part of rolling stocks shall be taken and annexed in the enquiry report. ART personnel should be trained for identifying such relevant part of track and rolling stocks involve in the accident.

9. In case of derailment of passenger trains causing injury to passengers, video recording of the concerned part of track and rolling stock shall be carried out by nominated ART personnel, trained for the purpose.

   Photography & videography of accident site shall be with great care & precision, similar to a crime scene photography/videography. ART personnel nominated for this shall be suitably trained for the purpose. The photographs, videos should be self explanatory such that relevant conclusion can be drawn.

10. Site sketch of the derailment/accident location shall be prepared giving due care that all the relevant items are included along with the dimensions. A sample sketch is attached for the guidance. Instructions for the preparation of sketch of the site of accident has given in "Accident Manual" shall be followed.

    Preservation of relevant clues, documents & photographs/videography of the accident scene shall be done under supervision of Safety Officials of the Division.

11. M&C report from RDSO must also be part of accident enquiry report in case accident is attributed to breakage of any component of track or rolling stock.

12. In case of a suspected sabotage, Tell-tale sign must be preserved and recorded.

13. If rail/weld failure is suspected to be cause of derailment, assessment of impact loading to which the rail/weld was subjected to prior to its failure becomes important. In such cases, WILD data for few preceding trains shall be analyzed for critical alarms and any critical alarm shall be brought out and deliberated by enquiry committee.

14. Observations of SM's Panel need to be recorded in case accident takes place in station area.

15. Speed recorders and event recorders in the locomotives shall be freezed immediately post the accident. SM's control panel shall be freezed till the time position of the knobs, switches, points & crossings etc. are jointly recorded. It is the responsibility of the concerned controlling officer / safety officials to ensure freezing of the above. Safety official shall take into custody of all the relevant documents, broken parts etc.

Annexure – 'A'

Proforma for Motive Power (Diesel &Electric)

Locomotive (Diesel & Electric): Proforma to be filled in case of accident /derailment when loco is involved in accident

1. Basic information:

a. Date of Accident :
b. Train No. :
c. Loco Class :
d. Loco Number :
e. Loco manufacture year and place :
f. Base Shed of Loco :
g. Date & Place last POH :
h. Kilometres earned after last POH :
i. Date & place of last major inspection :
j. Date & place of last schedule inspection :
k. Whether any schedule is overdue?

2. Give brief particulars of the safety items not provided or provided but missing/not working

Whether Loco is provided with:

Safety fittings	Provided	Working
Headlight		
Speedometer		
Speed Recorder		
Flasher light '		
Horn		
Brake System		
VCD		

3. Check & record the observations as follows:

(a) Position of control handles, cutout cocks etc after the accident.
(b) Functioning of brake synchronizing valve-whether working or not.
(c) Position of brake blocks after the accident- whether applied or not.
(d) Condition of cattle guard.
(e) Any sign of seizure of roller bearing in Axle box including condition of its components
(f) Condition of Pivot and Side Bearer arrangement of bogie including obstruction to Bogie rotation.
(g) Condition of Friction Damper components/ Hydraulic Dampers
(h) Condition of Traction Rod/ Guide Rod including its connection.
(i) Condition of Traction Link including its connection.
(j) Condition of Lateral Stop components between Bogie and Loco body under frame
(k) Any other observation in respect to mechanical defect of the locomotive, which might have any bearing on safe running of loco.

Note: Defective or broken material should be sent to CMT for testing, if necessary.

4. Measurement for Wheels for All Classes of Locomotives with wheel gauge (04 locations applicable for Bo-Bo Locos)

S.No.	Description	Observed value in (mm)			Remarks

Measurement for Wheels for All Classes of Locomotives with wheel gauge (04 locations applicable for Bo-Bo Locos) (Continued)

Notes:

1. Wheel number one is the outer end axle of truck under the short hood and wheel count increases towards the Long hood on diesel loco, whereas for Electric Loco, wheel number one is the outer end axle under Cab-1(Cab- 1 is that side of the loco which has the compressors and Cab-2 is that side of the *loco* which has the ARNO convertor) and wheel count increases towards the Cab-2.

2. The measurements of wheels are to be done using *wheel* gauges to RDSO drawing No.SKDL-3592 for all BG locomotives except WAP5 locos. For WAP5 locos RDSO's drawing No. SKOL-4446 and SKDL-4447 may be followed.

3. All measurements are to be taken on a level, un-canted track at the nearest yard.

4. Service limits given in the Maintenance Manual are for good maintenance practice and these are not safety limits. However, the measured values shall be compared with the service limits and degradation in values shall be discussed while finalizing the findings.

S. No.	Description	Observed value in (mm)		Remarks
7.	Wheel gauge: For checking wheel gauge, three measurements at equal spacing on the inner periphery of the two wheels on the same axle is to be recorded. Check for bent axle, if any.	1		All measurements shall be taken on a level tangent un-canted track. Information is relevant in case of wheel disc shifting/*bent* axle only. For safety, similar limits as applicable for track gauge are relevant for wheel gauge also
		2

		4		
		5		
		6		

	TO BE JOINTLY SIGNED BY	
SUPERVISOR (C&W/Loco)	SUPERVISOR (TRAFFIC)	SUPERVISOR (P.WAY)

5. Measurement of other relevant items:

S.No.	Description		Observed Value(in mm)	Remarks
1	Buffer /coupler height Measurement of parameters such as buffer length etc may also be done to check possibility of buffer entanglement.			All measurement shall be taken on a level tangent un-canted track. This measurement is required to be taken only in case of trailing stock is with buffers.
2	Lateral clearances	End Axles (1,3,4 & 6)		
		Middle Axles (2 & 5)		
3	Lateral clearances	End Axles (1,2,3 & 4)		Applicable for Bo-Bo locomotives only.
4	Longitudinal clearances, between axle box &bogie. Pedestal liner (for all axles)			Except WDP3A, WDG4, WDP4, WDP4B, WAP5 ,WAP7, WAG9 locomotives
5	Longitudinal clearances between axle box & bogie pedestal liner (for middle axles)			Applicable to WDP3A locomotive only.
6	Height of Rail Guard from rail level			
7	Condition of suspension Springs i.e. normal/ broken fresh and old fracture or deformities occurred after derailment due to sudden impact.			
8	Deflected height of coil spring after re-railing on level, un-canted track			
9	Condition of Rubber/ Elastomeric Spring Assembly at the Secondary stage			

Note – Measurement of items (e) to (j) in Para 3& item 8 & 9 in Para 5 will be done as per site condition.

Annexure – 'B'

Proforma for Wagon

Measurement Table for Wagon involved in Accident

Note: Details regarding all derailed vehicles should be given except: -

1. (i) Where vehicles have derailed due to locomotive derailment

   (ii) When the obvious and indisputable cause is sabotage or an obstruction on track

2. Front and rear and left (L) and right (R) are with respect to direction of movement.

3. For an obvious cause of derailment such as a broken axle, spring dropping off the run, and / or some part of under gear hanging loose and causing obstruction only relevant particulars need be filled.

4. Particulars for each derailing vehicle should be given in one sheet. Information against columns (5), (6), (8), (16), (17), (21), (22) should invariably be given for adjacent wagons on the same sheet.

5. Relevant details of adjacent vehicles should also be given if cause of derailment is not apparent.

Annexure-D

Proforma for Track measurement

PART – A

Proforma showing the detailed particulars to be collected in the case of Permanent Way during an Accident

Soil			Type of Formation	Rain Fall	Ballast		
S. No.	Type e.g. Sandy, Loamy clay, Moorum, Black cotton etc.	Condition - firm, wet slushy etc.			Type/Stone, Moorum, Sand, Ash etc.	Depth below sleeper bottom in cms. Stating whether clean or caked	Drainage
1	2	3	4	5	6	7	8

Width of shoulders in cm. from outside of rail				Sleepers				
Left	Right	Left	Right	Type - Wooden CST-9 Steel Trough etc.	Condition – New/ Second hand/ damaged/ Unserviceable etc.	Density	Square or not	Packing - Loose or sound
9	10	11	12	13	14	15	16	17

Rails			Rail fastenings		Rail joints		
Weight 52Kg./ 90 R/75R etc. (Year of Manufacturing)	Condition of wear (attach rail profile if wear is heavy)	GMT Carried	Dog/screw spikes, keys, tie bars, cotters, loose jaws etc.		Condition: Hogged battered, low etc.	Staggered or Square	Creep- Direction and extent of creep, type of creep anchors used with numbers per rail in the affected section
			Number per sleeper seat	Condition: Tight or loose or missing (in each sleeper)			
18	19	20	21	22	23	24	25

General remarks about cracks or fracture of fish plates, fish bolts and other components	Description of anti sabotage measures like reverse jaws welded rails etc.	Location of Points of mount		Location of points of derailment	
		Whether on straight, curve or transition	Whether on a falling grade, level or rising grade and or on sag	Whether on straight, curve or transition	Whether on a falling grade, level or rising grade and or on sag
26	27	28	29	30	31

Note –

(1) Left and right are with respect to direction of Train movement.

(2) The data in Col. 2 to 26 need not be collected when the defect is obviously and indisputably on account of sabotage and/or obstruction on track.

(3) Only broken track material which is not indisputably to be broken after the accident should be included in Col. 25 and should be preserved.

(4) Col. 27 need be filled in only when there is a suspicion about sabotage being the cause of derailment.

(5) Sag extends 90 metres on either side of theoretical junction of the grade lines Col. 29 and 31.

Proforma for Track measurement

PART – B

Station No.	Distance apart in metres	Gauge slack or tight from the Exact in **loaded condition** (mm)	Cross level under **loaded** condition (mm)	Marks on sleepers or rail top	Grinding or rubbing marks on rails
1	2	3	4	5	6

Examination of alignment for perceptible kinds of track distortion in the vicinity of the point of derailment	Subsidence of track	Versine in mm in **loaded condition**		Remarks regarding length of transition, degree of curve and specified super elevation general alignment etc.	Longitudinal level to be recorded in the case of M.G. and N.G. in case of sags and curves
		On 20 M or 10 M chord depending on practice prevalent on the Railway for flat curves more than 600 M radius	On 10 M or such shorter chords as considered necessary for sharp curves (less than 600 M radius on B.G. and M.G.		
7	8	9	10	11	12

Note –

(i) The point of mount should be marked station No. 0 and the stations numbered serially as (+) for measurements ahead of site of derailment and (—) for measurements in rear.

(ii) The cross level will be measured on the left rail only as determined from the direction of movement.

(iii) Normally measurement will be taken at station 3 M. apart for a distance of 45 metres on either side of 0 station if the cause of derailment is indisputably known, otherwise they will be taken for a distance of 100 metres in rear and 45 metres ahead of zero station.

(iv) Where necessary measurements for Col. 3, 4 and 5 may in addition be taken at individual sleepers.

(v) This proforma need not be filled when the cause of derailment is obviously established as due to sabotage, obstruction on track, broken axle, and/or spring having fallen off prior to point of derailment.

(vi) Longitudinal levels should be recorded for 300 metres on rear and 100 metres in front, in case of straights at the middle of each rail and at versine recording points on curves@20/10 M intervals.

TYPICAL SKETCH OF ACCIDENT SITE

3.14 NDMA's Guidelines on different types of Disasters :-

GOVERNMENT OF INDIA
MINISTRY OF RAILWAYS
(RAILWAY BOARD)

No. 2018/Safety(DM)/6/14 New Delhi Dated : 26.11.2019

General Managers
All Zonal Railways and
CMD/KRCL

Sub : NDMA's Guidelines on different types of Disasters.

In the recent past National Disaster Management Authority (NDMA, Ministry of Home Affairs has issued guidelines on the following:

1. Guidelines for Preparation of Action Plan – Prevention and Management of Heat Wave – Oct 2019
2. Landslide Risk Management Strategy – Sept 2019
3. Guidelines on Disability Inclusive Disaster Risk Reduction – Sept 2019
4. Guidelines on Temporary Shelters for Disaster-Affected Families – Sept 2019
5. Guidelines on Prevention and Management of Thunderstorm & Lightning / Squall / Dust / Hailstorm and Strong Winds – March 2019
6. Post Disaster Needs Assessment – Hand Book, SOP, Manual (issued by NDMA)

These guidelines can be downloaded from NDMAs website www.ndma.gov.in. Zonal Railways are requested to go through these guidelines, incorporate in their DM Plan and make use of the relevant portions during working.

CMD/KRCL

Sub : NDMA's study Report/Guidelines.

National Disaster Management Authority (NDMA, Ministry of Home Affairs has issued study report/guidelines on the following:

1. Study report on Gaja Cyclone – 2018.
2. National Guidelines for preparation of Action Plan – Prevention and Management of Heat Wave.

These study report/guidelines can be downloaded from NDMAs website www.ndma.gov.in. Zonal Railways are requested to go through study report/guidelines, incorporate in their DM Plan and make use of the relevant portions during working.

CHAPTER-4
REPORTING OF ACCIDENTS TO RAILWAY BOARD

4.0 A telephonic advice should be relayed to nominated officers in Railway Board's Office immediately after the occurrence of the following categories of accidents : -

a. All consequential train accidents above the threshold value and/or involving loss of human life.

b. Any yard accident having serious repercussion on movement of traffic on through/main line resulting in dislocation of traffic more than the threshold value.

c. Landslides, breaches, OHE breakdown, etc. which result in dislocation of traffic more than the threshold value.

d. Averted collisions.

e. Driver passing signal at danger.

Reporting of all accidents cases to Railway Board are now also required to be made through SIMS website (As per Advisor safety, Railway Board's letter No. 2011/Safety (A&R)/3/9 dated 30.11.2011)

4.1 Important telephone numbers of Railway Board's officials for reporting accidents:

The following list is as per the priority of officers to be informed at the time of an accident

Designation	Name	Rly Tel No.(Off.)	Rly Tel No.(Resi)	MTNL Tel No.(Off.)	MTNL Tel No.(Resi)	MTNL/Rly FAX	Mail Address
Principal Executive Director / Safety	Naresh Chand Goyal	43302, 47406	26863	23381344	23745537	23386215	nc.goyal@gov.in

Chief Cntroller Safety	-	43599, 43399, 47423	-	23382638	-	-	-
Safety Inspector	Sunil Kumar	44425, 47421	-	23304425	-	-	-

4.2 Telephone numbers of the CRS(Central Circle) and CCRS/LKO are as under:

S. No.	Designation & Name	Office	Residence	Mobile
1.	CRS-Central Circle Sh A.K.Jain	010-22695 (Rly.) 022-22056058 (DOT)	010-21309 (Rly) 022-22833784 (DOT)	8828110720
2.	CCRS/Lucknow Sh Shailesh Kumar Pathak	0522-2233108	-	9717630004
3.	PS to CCRS (Mr. Shrivastav)	-	-	9958278273

4.3 Accident Reporting to CRS :

As per section 113 & 114 of the Railway Act, 1989, the quantum of damage to Railway property has to be prescribed by the Central Government for an accident to be enquired into by the Commissioner of Railway Safety.

Any Accident which is attended with loss of human life or with grievous injury or with damage to Railway property of value exceeding Rs. 2,00,000/- (As per Joint Director/Safety, Railway Board's letter No. 200/Safety (A&R)/19/20 dated 28.09.2010) or accident to passenger carrying trains or the cases of landslides or breaches by flood or rain, which cause the interruption of any important through line of communication for at least 24 hours, should immediately be reported to the Commissioner of Railway Safety concerned.

N.B. - Reporting of accidents to the Railway Board and the CRS, shall be the responsibility of the headquarters safety organization, whereas the responsibility of transmitting necessary information to the headquarters and to civil and police authorities shall devolve with the division concerned.

❖❖❖

COMMERCIAL DEPARTMENT

ROLE OF COMMERCIAL CONTROLLER

On receipt of information of serious accident the following measure will be taken by Commercial Controller:

1. He will first inform to Sr.DCM, DCM, ACM & Sectional CMI about the nature, time and site of accident.
2. DCM will immediately proceed to Commercial Control in DRM office alongwith 2 TCs and will take position.
3. Sr.DCM will proceed to accident site alongwith ACM, CMI & 5 TC, porters and labours.
4. Commercial Controller will collect four copies of reservation charts of the concerned train in case of passenger train from PRS. Permission from CCM/PM should be taken.
5. Emergency Cell will be opened at Kota, SWM, GGC & BTE stations for information of passengers. SM/Kota will be over all incharge of Emergency cell. Dy/SS (Comml.) will assist SM/Kota. Emergency control must be opened at affected station.
6. Commercial Controller will collect the information from accident site and to be relayed to all emergency cell / enquiry offices which opened at station.
7. ACM will ensure proper catering arrangements and drinking water at accident site & relief train.
8. List of injured persons category-wise will be obtained from site of accident and accordingly ex-gratia payment will be given. Such list will be conveyed to Divisional Control office. List of injured persons will be given by the CMI at site hospital wise where they have been admitted.
9. Details of casualty-dead / injured and safe passengers should be given to emergency control at site, information of train composition, no. of passengers traveling in train, no. of passenger in affected train/coaches, no. of TTE available in train should also be relayed to commercial control.
10. In case of accident of Goods trains transport will be arranged along with labour for transhipment for which order will be given to sectional CMI and other supervisor staff available at site.
11. Detail of rescue operation and assistance being rendered to affected passengers. Telephone & Fax No. of the accident site must be taken.
12. List of Doctors, Hospitals and local authorities will be obtained from the concerned railway staff of the adjoining station.
13. DCM and Commercial Controller will ensure feeding of information regarding passenger name etc. to website in consultation with DSTE/Tele.
14. Transhipment of affected passengers to nearest hospital should be ensured for which road vehicle etc. must be arranged.
15. Chart of affected and un-affected passenger should be readily available for conveying information to next of kin/family of injured / dead passengers and also relayed to Control

Office, in division.

16. List of safe passengers should also be prepared and conveyed to Control Office.
17. List of affected / un-affected coaches should also be prepared and conveyed to Control Office.
18. Help should be provided to injured / affected passengers for shifting to the Hospitals.
19. Take action to save the lives and render first-aids and organized relief operation.
20. Will not leave site without permission of Sr.DCM.
21. Arrangement to save the luggage of affected passengers with the help of RPF/Security staff deputed by the State Govt.
22. Unclaimed items will be safely transferred to the LPO.

DUTIES OF TTEs AT THE TIME OF ACCIDENT/DERAILMENT:

TTEs / Train Supdt./Pantry Car staff should immediately report to the Guard and work under his directions. They shall:

- Ascertain if any doctor traveling, either by scrutinizing the reservation chart or by making verbal enquiries, and arrange for first aid to the passengers.
- Prepare a list of dead and injured. If doctor is available, the list should be classified as under :
  - ★ Dead
  - ★ Grievous injury
  - ★ Simple injury
  - ★ Make details of the dead and injured from the Reservation chart, tickets held (to and from) or co passengers. Assistance of Police traveling in the train may also be sought for identification.
  - ★ Collect the following details :
    - ❖ Ticket of the passenger traveling (to and from)
    - ❖ Ticket numbers – class
    - ❖ Coach number and its position from the Engine.
    - ❖ Address of the passengers
    - ❖ Nature of injury (simple/grievous)
    - ❖ Take custody of luggage & other belongings. In case of injured, this should be kept by the TTE and in case of death, it should be handed over to the GRP and full details and acknowledgement obtained.
    - ❖ Record evidence of willing passengers with full particulars. If some passengers are willing to give evidence later on, their name and address should record.
    - ❖ Record the number of dead and injured (simple and grievous), if they are already transported by the local people to the nearest hospital before the Railway doctors arrive.

DUTIES OF CMIs AT THE TIME OF ACCIDENT/DERAILMENT:

- Passengers should be provided alternative mode of conveyance and dispatched to their destination or hospitals on priority basis.
- Sectional CMIs should be available on site. Sectional CMI will arrange availability of refreshment material at the site of breakdown. CMI should know the map of the station of

their beat.

- List of injured / affected /stranded passengers should be prepared.
- Following lists should be available with CMI :
  - ❖ Hospitals
  - ❖ Ice factories
  - ❖ Nursing homes
  - ❖ NGOs
  - ❖ Blood Bank
  - ❖ Police Station important civil officials
- Arrangements for refund as per rules would be made.
- He should make arrangements for ex-gratia payments to passengers with the help of CBS, CPS, CGS & CTI as well as arrange other requirements by withdrawing money from station earnings after taking due permission from Sr.DCM.

ENGINEERING DEPARTMENT.

Mobilization of officers and staff:

On receipt of information from Control Office shall advise the following in order:

i) Sectional ADEN
ii) Sectional incharge SE/P.Way
iii) Sectional Sr.DEN
iv) Sr.DEN/Co
v) HQ Engg. Control, JBP
vi) Dy.CE/ Bridge line, HQ, JBP & BPL.
vii) SE/ P.way / North Kota incharge of engineering material in ART.

Sectional ADEN and Sectional SSE/P.Way will proceed by first available means. Sectional Sr.DEN will proceed to the site of accident by the ART or first available means. In the absence of Sectional Sr.DEN, the following alternative officer will proceed:

Sectional Sr.DEN	Alternative Officer
Sr DEN/Co	**Sr DEN/S**
Sr.DEN/S	DEN/N
DEN/N	Sr.DEN/S
DEN/C	DEN/E
DEN/E	DEN/C

In the case of Sectional ADEN on leave, the alternative ADEN should move as per following arrangement:

Sectional ADEN	Alternative Officer
BTE	GGC
GGC	BTE
SWM	GGC
C/Kota	RMA
RMA/Kota	C/Kota
SGZ	RMA
BAZ	C/Kota

Sectional ADEN before moving to the site of accident shall also order his SSE/ SE/Work to proceed to site if there is any possibility of involvement of Bridge or some other structure near site of accident.

Engineering Control:

Sr.DEN/CO & ADEN (W) shall move to Divisional Engg. Control. Other Sr.DENs/ DENs will work in Engineering control as nominated by Sr.DEN/Co by rotation, if required. The senior most officers available in the Div. headquarter will be coordinator for all the activities. In case Sr.DEN/Co not available Sr.DEN/S will look after his work. In case of Sr.DEN/S not available DEN(E) will look after.

Mobilization of work force and P. Way material:

Accident in the Division-

The Sectional ADEN, SSE/P. Way after reaching the site of accident shall ascertain the extent of damage for P.Way track including turnouts, bridges etc. & relay the position to Sr.DEN/Co in

Engg. Control. After assessing the position of P.way material in the division, Sectional Sr.DEN shall finally place his net requirement to Sr.DEN/Co in Engg. Control.

The local available P.Way material shall be moved by road after hiring transport.

Sectional Sr.DEN shall also place his requisition for withdrawal of money from station earning for emergent requirement at site such T & P required, hiring of transport etc. through Engg. Control.

Sr.DEN/Co shall order the movement of Engg. /ART containing P. Way material to site.

Sr.DOM shall be asked to move the same immediately.

In case the requirement of material is not met out within the division, HQ (CTE) shall be advised for arranging the same.

SSE (P.Way)/Depot Kota shall be available in Central depot for issuing P.Way material as per instruction of Sr. DEN/Co /KOTA.

WORK FORCE:

Sectional ADEN shall order movement of labour of his sub division. Normally 100 men are mobilized within one sub division. They will be moved either by truck or train, which ever is first available. Sectional Sr.DEN will relay the requirement of additional work force to Sr.DEN/Co. 50 men, 01 blacksmith with one supervisor shall move to the site from each sub-division by road or rail as directed by Sr.DEN/Co. Labour special shall be organized by Sr.DOM after discussion with Sr.DEN/Co. One SSE/Work or SSE/P.Way will be deputed at site to keep details of labour & Supervisors reaching at site & distributing work as per instructions of Sectional Sr.DEN. Any assistance required over and above the division, shall be flashed to Engg. Control, HQ JBP for seeking the help from adjoining divisions by the Sr.DEN/Co. In case of restoration time likely to be more than 12 hours, Sr.DEN/Co shall arrange relief for officers & supervisors.

ACCIDENT IN ADJOINING DIVISION:

Sr.DEN/Co/Kota, on receipt of information from HQ shall order the movement of labour & supervisors as asked from nearby sub-divisions @ 50 men, 01 blacksmith & 01 supervisor from one sub division. On receipt of instructions from PCE/WCR or CTE/WCR Sr.DEN/Co shall order one Sr.DEN and one ADEN to move with staff to the location as jointly decided with the Sr.DEN(Co) of adjacent division.

ENGINEERING MATERIALS on ART

The Engineering material as per prescribed scale loaded in Engg. Vans/ BRH/ BFR will be maintained by SSE/P.Way/North-Kota and SSE/P.Way/North-GGC and shall be checked by ADEN/Central and ADEN/GGC regularly.

These wagons will be moved as per order of Sr.DEN/Co. After every movement, material used/issued will be made up by SSE/P.way/N/Kota, SSE/P.Way/Depot, SSE(P.Way)N/GGC and ensured by ADEN/Central and ADEN/GGC.

Contingency plan:

A booklet on contingency plan is available with CMTS containing telephone numbers of all agencies supplying tentage, water supply, and earth moving machineries etc in different locations. These should be referred to Officer in Control. Sectional SSE/Work shall exclusively responsible for setting up of these facilities. He shall move with sufficient staff for setting up of these facilities. Temporary kitchen in tent/shamianas is to be set up so that catering unit arranged by Commercial

Department can make use of it to provide hygienic food. Tentage, shamianas, chairs etc shall be arranged for the passengers, injured as per requirement.

SR.DEN/DEN in Engineering Control will request the concerned authority (Army/State Govt. deptt.) for bulldozer, earthmoving machinery etc. in the area if required.

Drawing sketch of site of accident:

One SSE/Work will be nominated exclusively for preparing of sketch of site of accident. He shall work under the direction of Sectional ADEN/Site-in charge ADEN. He shall also preserve clues/evidences, if any, at the site of accident leading to the cause of accident.

CHECK LIST FOR ENGINEERING CONTROL

1. 1. Information of accident given to:

ADEN	SSE/P.Way	Sectional Sr.DEN	Sr.DEN/Co	HQ Control

2. Information regarding location of accident, train involved etc.
3. Information of any special feature involved such as Bridge, Level crossing, buildings etc.
4. Information of accident along with available details given to HQ Engg. Control.
5. Information on track materials/T&P/P.Way staff required for restoration collected from site through Sectional ADEN/ Sectional Sr.DEN.

Rails	Sleeper Fittings	Fittings	Points & Crossings	T&P	Supervisors	Blacksmith	Trackmen

2. H.Q. informed about staff/Materials assistance required from HQ/other Divisions:

Item				
Quantity				

3. Movement of ART (P.Way Van/BFRs) within Division & from other Divisions.

Division	ART	Moved at	Reached Site

4. Information of Officers/ Staff moved to site. (Names & Designation)

	Name	Designation
Officers		
SSE-P.Way		
SSE-Bridge		
SSE-Works		
Staff		

CHECK LIST FOR SITE ENGINEERING INCHARGE

1. Detailed survey of site of accident done.
2. Assessment of track damage/P.Way material/Manpower/Machinery required for restoration & relaying the same to Engg. Control
3. Site office/Tenting/Shelter put up at site as per plan.
4. Water arrangement/Stay arrangement made for staff.
5. Site Sketch Preparation.
6. Joint observations/Track reading/Wagon/Coach reading etc.

7. Lighting arrangement for night work.
8. Proper unloading of materials at site.
9. Duties assigned to officers/Supervisors/Staff.
10. Tent Parties/Earth moving matching agencies/Water agencies contacted & informed for action.
11. Temporary Kitchen set up at site.

SETTING UP OF EMERGENCY ELECTRICAL CONTROL

Electrical Control Staff: (1) Sh. N.R. Chaudhary SSE (TL&RAC)
(2) Sh. B.K.Sharma SSE/P (Stand by)

MOBILIZATION OF STAFF:-

- In case of accident, the two nearest depots, one from either side of the accident site and Zonal in charge will move to the site with available man and material. In case of more assistance,

the necessary instructions will be issued by officers manning Electrical control.

- As soon as the ART has reached the accident site, the ART Electrical in charge will provide portable generators along with lighting fixtures at accident site.
- One VHF set should be available with electrical control at site and one with Sr. Supervisor at site to meet out the lighting requirement at site.
- It is the personal responsibility of the concerned ART in charge to keep the electrical equipments in good working condition.
- Electrical control office would be set up near Emergency Control office manned by Supervisor round the clock.

❖❖❖

ELECTRICAL TRD DEPARTMENT

EMERGENCY ACTION TO BE TAKEN BY TRD DEPARTMENT:

Action will be taken by TPC either through first information from site or section control or after CB tripping & section does not hold good after second reclosure.

- As soon as TPC gets information about any abnormality (in case there is no CB tripping) either from site or ATNL, he will immediately open the feeding circuit breaker/BM of the concerned section for making OHE dead on both UP & DN lines. A hooter controlled & sounded by ATNL is installed in TPC room may be taken care of in emergency situations.
- As soon as CB trips and does not hold on second reclosure, concerned TPC will immediately start segregation on SCADA system to locate faulty section. After locating faulty section, he will make the adjoining DN / UP healthy section dead to stop any movement of electric trains in either of the two directions (Item No. 1 & 3 of para 5 Appendix VIII of ACTM Vol. II Part II)
- The TPC will inform the concerned ATNL regarding the abnormality and will try to get the details about the abnormality. Further he has to ensure through ATNL that no movement of electric train takes place from healthy and charged section to uncharged/dead section.
- TPC will then inform to the concerned TRD maintenance depot & supervisors, and shall ask them to be ready for movement to the site where abnormality has taken place. The information is then to be relayed to CTPC and he has to be told to reach in TPC.
- Further the information will be relayed to concerned ADEE/DEE and Sr.DEE/TRD. The TPC will further inform to the adjoining nearest depot to get ready for movement or any OHE gang available in section at that point of time. The OHE staff shall be informed about the location and shall be directed to site of abnormality by a road vehicle / truck.
- The Tower Wagon based at concerned depot to be moved on priority. Tower Wagons stabled in adjoining depots shall also be moved on priority so that it reaches the site from other end.
- The OHE supervisor, who reaches first at site will survey the site, assess the damages and will convey the status to TPC. Depending on this information the reinforcement if any required, movement of adequate T&P and material / equipment shall be arranged by TPC.
- In case of any OHE breakdown or breakage of OHE wires takes place the area around it should be cordoned off, so that no one gets injured.
- If there is a case of an electrocution no attempt to rescue an electrocuted person be made until it is ensured that power supply has been cut off to the effected line. Call for medical assistance. In the meanwhile, after the injured, if any, has been separated from the OHE wires, shall be given first aid.

MOBILIZATION OF OFFICERS AND STAFF.

- Sr DEE/TRD will proceed to the site of accident by first available means of transport. In the absence of Sr.DEE/TRD, DEE/TRD will proceed. Sr.DEE/TRD or DEE/TRD will man the TPC.

Following is the jurisdiction of officers.

Sr.DEE/TRD/ Kota	:	Complete electrified section of Kota Division i.e. NAD to MTJ on Main line and (Kota to RTA & RMA to JLWC) on branch lines.
DEE/TRD/Kota	:	RDT to AMLI on Main line and Kota to RTA on branch line i.e. TRD Depot KOTA, LKE, BAZ & CAG.
ADEE/TRD/SGZ	:	NAD to RDT & RMA to JLWC i.e. TRD depot VMA, SGZ & RMA.
ADEE/TRD/BTE	:	AMLI to MTJ i.e. TRD depot SWM, GGC, HAN, BXN & BTE.

SETTING UP OF EMERGENCY TRD CONTROL.

Four TRD supervisors (TPCs) always man Emergency control of TRD round the clock, one on each of the four boards i.e. one for NAD – KOTA, one for KOTA – GGC, one for GGC – MTJ & one for Kota – RTA section. CTPC is the in-charge of this TPC control.

MOBILIZATION OF STAFF AND MATERIAL:

- **Accident in Own Division:**

In case of accident within division two nearest depots one from either side out of the following shall move by Tower wagon / Truck to the site immediately depending on the location of the site:

1.	VMA Depot	:	at 735 KM
2.	SGZ Depot	:	at 787 KM
3.	RMA Depot	:	at 849 KM
4.	KOTA Depot	:	at 918 KM
5.	LKE Depot	:	at 981 KM
6.	SWM Depot	:	at 1030 KM
7.	GGC Depot	:	at 1092 Km
8.	HAN Depot	:	at 1136 KM
9.	BXN Depot	:	at 1169 KM
10.	BTE Depot	:	at 1211 KM
11.	BAZ Depot	:	at 66 KM
12.	CAG Depot	:	at 125 KM

Supervisors, staff, TW/Trucks of the adjoining depots may be sent to the site of accident, if required depending upon the assessment of work involved, for restoration. TW/Truck will move to Break down site within 30 min. during day time and 45 min. during night time.

- **Accident in adjoining Division / Railway:**

RTM division of WR, Agra division of NCR, BPL division of WCR & JP division of NWR.In case of accident in adjoining divisions, SSE/TRD along with TW/Truck and staff will be sent on demand/requirement. In case of more assistance, officer manning the TPC will issue the necessary instructions.

Emergency sockets are provided at an interval of each Kilometer. Near TSS/SP/SSP, isolator, insulated overlap etc. Using these sockets communication can be made with TPC. Further TPC control phones and Railway Auto Phones are available in ASM chamber of each station in electrified area.

❖❖❖

ACTION PLAN BY ELECTRICAL (TRO)

Action Plan of Electrical (TRO)-Kota Division for disaster management will be as under:-

S. No.	Item	Details
1	Resource Unit-I	On trains carrying passenger following resources should be available with crew: i) Portable telephone with crew. ii) Walkie-Talkie with Guard and Loco Pilot as personal equipment. iii) CUG mobile with LP, ALP and LI.
2	Disaster Response (Instant Action Team-IAT)	Crew is included in IAT. As a member of IAT he should act as under: - i) If he has CUG relevant official numbers (Control, TLC, Lobby) should be fed into his mobile equipment permanently. ii) They should keep a torch handy and secured.
3	Duties of LP	i) Note the time of the accident and location. ii) Switch 'ON' the "Flasher Light" of the locomotive and sound whistle code. iii) Inform Guard on walkie-talkie set. iv) Inform Station Master on walkie-talkie set if possible. v) Protect the adjacent line, if required, and the train in front as per G&SR 6.03. vi) Take necessary action to keep the Loco safe. vii) Take necessary action to prevent Loco/Vehicles/Wagons from rolling down. viii) Send the information through quickest means to Control office and SMs on either side of the Block section. For this purpose:- a. Walkie-talkie communication provided with stations should immediately be used. b. Otherwise field telephone should be used. c. If a Train comes on the other line which is not blocked, the same should be stopped and information sent through the Loco Pilot. d. Assistant Loco Pilot or Assistant Guard may be sent to the next station to convey information of the accident if a,b,c fail. e. If all of the above fail, one of the Railway staff on duty on the train should be sent on foot to the nearest station. f. Render all possible assistance to the guard. g. Preserve all clues and evidences regarding probable cause of the accident and ensure that these do not get disturbed.
4	Locating the nearest level crossing gate	The train Loco Pilot is the best and faster source of information regarding location of the nearest manned level crossing gate in either direction. The crew will intimate the IAT in-charge about the gate location whenever asked.

5	Duties of LI	i) Reach the site of accident by quickest available means. ii) Ensure that the obstructed line is protected. iii) All of them should work as per directions of OIC site. iv) Joint measurement and preservation of clues and evidences.
6	Action to be taken by Electrical (TRO)	i) TLC, on getting first information, will collect brief details about the accident. ii) TLC (Unusual) will relay this information to CTLC, ADEE/TRO/Kota and Sr.DEE/TRO/Kota. iii) If information is received from sources other than Traffic dep tt. TLC will inform immediately to Dy. Punctuality for appropriate action/protection. iv) TLC(Unusual) will immediately made the following arrangements:- a. Loco Inspector to be directed to site with SPM Keys & Breathalyzer. b. Maintenance staff from nearest out pit to be moved, with tools, if loco is involved. c. TLC/Crew will enquire that required numbers of crews to be dispatched from Kota & GGC for running trains in case of diversion, if any. d. A Dual brake loco with crew to be kept ready from nearest sources. e. As per requirement nearest shed to immediately arrange maintenance staff and keep them ready to move with tool. f. Vehicle with driver to be kept ready for moving any man and material. v) Sr.DEE/TRO, ADEE/TRO and CTLC will arrive in control. vi) TLC/Unusual will do all the se arrangements in shortest time. TLC/Movement will watch all the latest development regarding accident on train charting and section chart and will inform the TLC/Unusual about details. vii) TLC will advise LP/LI for freezing SPM memory and collect information regarding kilometer number, exact location and condition of Loco & OHE assistance required. viii) The CTLC, ADEE/TRO will take full control of situation in TLC and for recording/ logging details in accident register and will advise HQ office accordingly. ADEE/TRO will co-ordinate with Shed/Lobby/other control for all assistance and decisions. ix) Required numbers of suitable Goods Locos and Loco Pilots should be arranged as spare for operating coaching services. x) Updated list of CUG mobile phones provided to TRO staf f should be available in TLC Office.

MECHANICAL DEPARTMENT

Mobilization of Officers and Staff:

Nominated Officer
Sr.DME (O&F)
ADME Incharge 140 T Crane

Alternative Officer
Sr. DME (Co)

Sounding of Hooter

- For Kota break down, the siren hooter will be operated by Dy CHC as per disaster manual para and 3.4 (9) accident manual para 405 as per prescribed code.
- For GGC break down ordering, the siren hooeter will be operated by lobby supervisor under advise of Dy CHC Kota as per disaster manual para and 3.4 (9) accident manual para 405 as per prescribed code.
- PCOR will keep the time log of Hooter sounding besides other things

General

- Nominated Supervisor for Kota/GGC will move with break down.
- In case of main line infringement requiring Kota/GGC break down Sr.DME O&F will proceed to site by available means.
- In case of other break down cases of Kota/GGC, ADME will proceed to site by available means.
- In case of GGC break down movement BTE and SWM staff shall proceed to site of accident by available means in consultation with carriage control.
- SSE/ARME, CLI (D) and nominated staff of ARME shall move with ARME.
- SSE/ART, CLI (D) and nominated staff of ART shall move with ART.
- All CLI (D) shall act as standby supervisors for SSE (ART) and SSE (SPARME).
- CLI (D) will monitor ART movement timing and will ensure running of break down at prescribed speed.
- All out of course stoppage will be immediately communicated to PCOR and Sr.DME in control.
- CLI (D) will discharge the function as per accident manual para 315.
- After sounding of hooter/alarm, CLI(D)/ DCWI/SSE will quickly reach the ART. However, their movement shall be governed by the instructions made by Sr.DME or the concerned officers in his absence.

Setting Up Of Emergency Mechanical Control (Power Control and C&W Control).

Sr.DME Co shall man division mechanical controls (Loco and C&W) round the clock and will follow the duty list as contained in Disaster Manual Part I Para 8.8 and Accident Manual para 8.8 and Accident Manual para 305. He will coordinate all the activities being controlled at divisional control office i.e., both Power control and C&W control, such as running of all special trains, including diversions & Relief trains. The officer shall be assisted by CPCR/CLI (D) and CCCR/DCWI.

Setting Up Of Site Offices, Tentage, Shelters & Drinking Water Facilities:

- SSE/ART shall be exclusively responsible for setting up of these facilities. He will depute the sufficient staff for setting up of these facilities.
- Photographs at accident site will be taken with the help of Digital camera available in each ART.
- Conference office available in ART will be utilized for having important meetings. The conference office is adequately furnished.
- Assistance from Local/Civil authority can be taken as per available information.
- In addition to relief and restoration work, it will be the top most responsibility of each ART staff/officers to carry out all the efforts to save human life, provide shelters to the stranded railway passengers

❖❖❖

MEDICAL DEPARTMENT Kota

The following procedure is to be followed at Divisional Railway Hospital, Kota during train accidents where casualties are anticipated.

The information regarding the accident may be received through:

(a) Hooter sound (Four times)

(b) Information on telephone in the casualty from control room.

(Control should inform casualty of Divisional Railway Hospital and CMS as soon as SPARMV is ordered)

The Medical department is divided into three teams to cope with the Railway accident.

(1) Team A-1 Leader CMS / ACMS (Admin.)/Senior most IRMS Doctor to move by SPARMV.

(2) Team A-2 Leader Dr. Rajan Gupta to move by Ambulance. In his absence Dr. R.S.Meena will head Team A-2.

(3) Team B. Dr. Anil Upadhyay will move to Divisional Control office. (In his absence Dr. Manisha Sharma will move to Divisional Control Office.)

Dr. Manisha Sharma will move to Divisional Hospital, to establish Emergency Cell and manage hospital working and emergencies.

DUTIES OF THE DOCTOR AND PARAMEDICS ON CASUALTY DUTY

- On receipt of the Accident information through hooter or control room, the doctor and paramedics on Casualty duty will note down the source and time of the information / message received the train number(s), the site of accident, and the section involved in the prescribed Performa. He/She will first of all inform CMS or in his absence ACMS(Admin.) / Senior most IRMS doctor on the day.
- In-charge nursing staff casualty will pass on the information received from the control room / hooter to all nominated members of Team A-1, A-2 & Team B with assistance of other paramedical staff. On duty nursing staff of FMW and MMW will assist Casualty Nurse to inform nominated staff.
- Nursing staff I/C of MSW and FSW, along with Dresser/HA of Casualty will move by Ambulance to SPARMV/ARMV siding and report to ASM on duty available near the SPARMV/ARMV siding. They will carry Inj. Tetanus Toxoid vaccines (50 doses) and Anti snake venom in vaccine carrier with them.
- Team A2, carrying with them a POMKA, will report at SPARMV and will move by Ambulance to accident site if approachable by road in time (one hour). If not, the team (Doctor, Nurse & OTA) will move with SPARMV/ARMV and Ambulance with stretcher bearers will proceed to the site by road.
- Leader of Team B will report to Casualty, Divisional Railway Hospital & establish Emergency Cell in CMS Chamber.

The function of all the teams are as follows:

DUTIES OF TEAM A-1 :

- Team A-1 will report to the ASM on duty near the SPARMV/ARMV within 15 minutes and obtain written acknowledgement from the ASM regarding arrival of the medical team with time & date.

- The team will then proceed to the accident site by SPARMV/ARMV and leader of Team A-1 (CMS/ ACMS(Admin.) or the next senior most IRMS doctor) will remain in close contact with Team A-2, Team-B, doctor I/C of the Hospital/ Health unit of the concerned section & Doctor in Control room.
- En-route, the leader of team A-1 will nominate doctors and paramedical staff for the duties to be performed at the accident site as per need of the situation. **H**e will contact the medical facilities in the vicinity of accident site and ask them to be prepared for casualties depending on the nature and magnitude of the accident.
- One doctor will be nominated for conducting medical examination including Breath Analyzer Test of the Loco Pilot/Asstt. Loco Pilot & Guard of the train(s) involved.
- One Doctor will be nominated to take care of the dead bodies till their final disposal with the help of Civil Authorities/GRP. He will be assisted by the doctor nominated for conducting medical examination of the crew, after he/she has finished the medical examination.
- Doctors will be deputed for providing first aid to the injured at the accident site and arrange for their transportation to the nearby hospitals.
- One doctor will be deputed to visit nearby hospitals and gather information regarding the injured persons admitted there if any. He will pass on the relevant information to CMS / Nodal Officer at the accident site.
- The leader of Team A-1 will remain available at the accident site and will not leave the accident site under any circumstances, except when specifically permitted by the DRM. He/She should be available himself/herself near the telephone at the accident site and coordinate all the relief measures. He will establish communication with the Emergency Cell at Divisional Hospital and leaders of the Team A-2 & B.
- The leader of Team A-1 will collect information from other doctors/sources about the details of dead and the injured persons and will get a preliminary list of dead/injured persons prepared in triplicate. The list will bear the date and time and will have the following columns; Sr. No, Name, Father's / Husband's Name, Age, Sex, Address with Telephone Number if any, Ticket Number, Ex and To, Details of injury, Nature of Injury and remarks etc. In case of the number of dead and injured persons is large, only Sr.No. Name, Age, Sex and Nature of Injury will be written as first hand information and suitable updating can be done later on.
- He will hand over 1st copy of the same to the senior most officer of the Commercial department available at the site, after putting his signature on it. The 2nd copy will be kept by the Nodal Officer of Team A-1 as office copy and 3rd copy will be given to paramedical staff for getting multiple copies for further distribution. This list will be suitably revised / updated on receipt of further information from all possible sources.
- The list will also contain information about the persons having trivial injuries like petty abrasions and bruises but these will not be counted for reporting purposes and will be retained by the leader of Team A-1 for record purpose only. The number of dead and injured (simple and grievous) should only be reported.

DUTIES OF TEAM A-2:

- Leader of Team A-2, along with paramedical staff will first move to SPARMV/ARMV carrying a POMKA and thereafter to the accident site by road, if approachable. If not they will move in SPARMV/ARMV.

- They will remain in contact with leader of other teams and on instructions from leader of A-1 team will be deputed to various hospitals to collect information about the injured persons admitted there, monitor their progress and coordinate with the hospital doctors in providing suitable medical aid and arrange for the transportation of the injured to other better hospitals on a need basis.

DUTIES OF THE DOCTOR IN-CHARGE OF DEAD BODIES*:*

- He / She will note down the detailed particulars of the dead bodies and arrange to shift them to a nearby nominated place, away from the track / bogies with the help of paramedical staff, St. John Ambulance members, Bharat Scouts & Guide volunteers, Civil-defense members and other Railway / non Railway volunteers available at the site.
- He will put a white cloth with label on the chest (below the neck) of the dead body and indicate the following details with the marker pen; date, dead body S. No., Name, Age, Sex etc. In case of unknown dead bodies, unknown-1, unknown-2 etc. should be mentioned against the name column and estimated age should be mentioned as per appearance.
- The dead body will be kept inside a Plastic body bag with Zip and the information about the dead body will also be mentioned thereon.
- The dead bodies will then be handed over to the Civil authorities/GRP for medico legal procedure and final disposal.
- In case the disposal of dead bodies is delayed due to non availability of the relatives or due to any other reason, he will arrange for preservation of the dead bodies by arranging ice etc.
- He will arrange for final disposal of the dead bodies by providing foldable coffins / wooden coffins from the Divisional Hospitals on a need basis which are available in mortuary of Divisional Railway Hospital.

DUTIES OF DOCTORS VISITING VARIOUS HOSPITALS WHERE INJURED PERSONS ARE ADMITTED/DEAD BODIES ARE LYING.

- Before leaving the accident site, they will note down the DOT/Railway/Mobile Phone numbers of the Nodal Officer and other medical officers available at the accident site.
- In case railway vehicle/Ambulance is not available, they will hire private road vehicles to visit various hospitals. Doctors going to different hospitals will hire separate vehicles for their movement.
- On reaching the hospital, they will prepare a list of injured/dead and relay the same to the Nodal Officer available at the accident site.
- They will monitor the progress of the injured persons and arrange for their transportation to bigger hospitals with better facilities on a need basis.
- They will coordinate with the doctors of the respective hospitals in providing proper treatment and settlement of the bills at the time of discharge.
- They will remain at the hospital for briefing the VIP's visiting these hospitals.
- They will also coordinate with the officials of the Commercial/ Personnel Department for arranging ex-gratia payment to the accident victims.

DUTIES OF DOCTORS INVOLVED IN RESCUE OPERATION:

- They will arrange for an Ambulance / other suitable transport immediately, in advance, to

transport injured persons.

- They will provide preliminary treatment to the injured and hand over the dead bodies to the doctor in-charge of the dead bodies.
- They will pass on the detailed information about the injured persons to the doctor preparing the list of injured persons.
- They will arrange to transport the injured persons to the nearby Railway/Govt. / Private Hospitals.
- A detailed search operation will be conducted by them at the accident site to look for any injured persons/ dead bodies trapped inside the bath rooms/ under debris etc. The search operation will be repeated before the medical team finally leaves the accident site.

DUTIES OF TEAM 'B' :

- They will establish Emergency Cells in CMS's chamber and Casualty of the Divisional Railway Hospital where Railway telephone, P&T telephone, Fax Machine & computer is available to look into section wise Data base of medical facilities available along the track. They will also call CA to CMS and Peon of CMS for this work.
- They will communicate with adjacent Divisions (including Divisions of other Zones) to send Medical teams to the accident site, if the nature and magnitude of the accident warrant it.
- They will contact the local Railway/Govt./Private Hospitals near the accident site to be in readiness to provide medical treatment to the injured persons.
- They will contact and arrange to send more medical teams, SJAB members, BS&G Volunteers, Civil Defense members and other Railway / non Railway volunteers to the accident site on a need basis.
- They will establish close communication with the Divisional Control and the Nodal Officer at the accident site & leader of Team A-2 for regular exchange of information.
- They will keep the Divisional Hospital in readiness including operation theatre, to receive and provide medical treatment to the injured persons. They will also intimate the nearby Govt./Private Hospitals and blood banks for this purpose.
- They will arrange to transport wooden / foldable coffin boxes to the accident site on receipt of requisition from the accident site.
- Dr. Anil Upadhyay will move to Divisional Control office and Dr. Manisha Sharma will monitor work of Hospital in consultation with Doctor I/C present at Divisional Hospital, Kota. In absence of Dr. Anil Upadhyay, Dr. Manisha Sharma will move to Divisional Control office and next senior most Doctor will head Team B.

MORTUARY :

It is situated near garage in the premises of Divisional Railway Hospital, Kota. It is Air Conditioned & six bodies can be accommodated at a time.

NOTE :

The Keys of ARMV Scale-I at Kota are available one in ASM's room and one in casualty room of DRH Kota.

ACTION PLAN OF SDRH/GGC FOR DISASTER MANAGEMENT

The following procedure is to be followed at Sub Divisional Railway Hospital, GGC during train accidents where casualties are anticipated.

The information regarding the accident may be received through:

(a) Hooter sound (Four times)

(b) Information on telephone in the casualty from control room. **(Control should inform casualty of Sub Divisional Railway Hospital and ACMS as soon as ARMV is ordered)**

The Medical department is divided into three teams to cope with the Railway accident.

(1) Team A-1 Leader ACMS / Senior most IRMS Doctor (Dr. Dhiraj Goyal) to move by ARMV.

(2) Team A-2 Leader Dr. Vivek Ranjan to move by Ambulance.

(3) Team B. Dr. Anurag Goyal will move to Sub Divisional Hospital office, to establish Emergency

cell and manage hospital working and emergencies

DUTIES OF THE DOCTOR AND PARAMEDICS ON CASUALTY DUTY :

- On receipt of the Accident information through hooter or control room, the doctor and paramedics on Casualty duty will note down the source and time of the information / message received the train number(s), the site of accident, and the section involved in the prescribed Performa. He/She will first of all inform CMS, Dr.Mukhrjee or in his absence ACMS or Seniormost IRMS doctor in his absence on the day.
- In-charge nursing staff casualty will pass on the information received from the control room / hooter to all nominated members of Team A-1, A-2 & Team B with assistance of other paramedical staff. On duty nursing staff of SDRH GGC to inform nominated staff.
- Nursing staff I/C of SDRH GGC along with Dresser/HA of Casualty will move by Ambulance to ARMV and report to ASM on duty available near the ARMV.
- Team A2, carrying with them a POMKA, will report at ARMV and will move to accident site by Ambulance if approachable by road in time (one hour). If not, the team (Doctor, Nurse and OTA) will move with ARMV and Ambulance with stretcher bearers will proceed to the site by road.
- Leader of Team B will report to Casualty, Sub Divisional Railway Hospital & establish Emergency Cell in ACMS Chamber.

The function of all the teams are as follows:

DUTIES OF TEAM A-1 :

- Team A-1 will report to the ASM on duty near the ARMV within 15 minutes and obtain written acknowledgement from the ASM regarding arrival of the Medical team with time & date.
- The team will then proceed to the accident site by ARMV and leader of Team A-1 (ACMS or the next senior most IRMS doctor) will inform to CMS Kota and remain in close contact with Team A-2, Team-B, doctor I/C of the Hospital/ Health unit of the concerned section & Doctor in Control room.
- En-route, the leader of team A-1 will nominate doctors and paramedical staff for the duties to be performed at the accident site as per need of the situation. He will contact the medical facilities in the vicinity of accident site and ask them to be prepared for casualties depending on the nature and magnitude of the accident.
- One doctor will be nominated for conducting medical examination including Breath Analyzer Test of the Loco Pilot/Asstt. Loco Pilot & Guard of the train(s) involved.
- One Doctor will be nominated to take care of the dead bodies till their final disposal with the

help of Civil Authorities/GRP. He will be assisted by the doctor nominated for conducting medical examination of the crew, after he/she has finished the medical examination.

- Doctors will be deputed for providing first aid to the injured at the accident site and arrange for their transportation to the nearby hospitals.
- One doctor will be deputed to visit nearby hospitals and gather information regarding the injured persons admitted there if any. He will pass on the relevant information to ACMS / Nodal Officer at the accident site.
- The leader of Team A-1 will remain available at the accident site and will not leave the accident site under any circumstances, except when specifically permitted by the DRM. He should be available himself near the telephone at the accident site and coordinate all the relief measures. He will establish communication with the Emergency Cell at Sub Divisional Hospital and leaders of the Team A-2 & B.
- The leader of Team A-1 will collect information from other doctors/sources about the details of dead and the injured persons and will get a preliminary list of dead/injured persons prepared in triplicate. The list will bear the date and time and will have the following columns;

  Sr. No, Name, Father's / Husband's Name, Age, Sex, Address with Telephone Number if any, Ticket Number, Ex and To, Details of injury, Nature of Injury and remarks etc. In case of the number of dead and injured persons is large, only Sr.No. Name, Age, Sex and Nature of Injury will be written as first hand information and suitable updating can be done later on.
- He will hand over 1st copy of the same to the senior most officer of the Commercial department available at the site, after putting his signature on it. The 2nd copy will be kept by the Nodal Officer of Team A-1 as office copy and 3rd copy will be given to paramedical staff for getting multiple copies for further distribution. This list will be suitably revised / updated on receipt of further information from all possible sources.
- The list will also contain information about the persons having trivial injuries like petty abrasions and bruises but these will not be counted for reporting purposes and will be retained by the leader of Team A-1 for record purpose only. The number of dead and injured (simple and grievous) should only be reported.

DUTIES OF TEAM A-2 :

- Leader of Team A-2, along with paramedical staff will first move to ARMV carrying a POMKA and thereafter to the accident site by road, if approachable. If not they will move in ARMV.
- They will remain in contact with leader of other teams and on instructions from leader of A-1 team will be deputed to various hospitals to collect information about the injured persons admitted there, monitor their progress and coordinate with the hospital doctors in providing suitable medical aid and arrange for the transportation of the injured to other better hospitals on a need basis.

DUTIES OF THE DOCTOR IN-CHARGE OF DEAD BODIES *:*

- He / She will note down the detailed particulars of the dead bodies and arrange to shift them to a nearby nominated place, away from the track / bogies with the help of paramedical staff, St. John Ambulance members, Bharat Scouts & Guide volunteers, Civil-defense members and other Railway / non Railway volunteers available at the site.
- He will put a white cloth with label on the chest (below the neck) of the dead body and indicate the following details with the marker pen; date, dead body S.No., Name, Age, Sex etc. In case of unknown dead bodies, unknown-1, unknown-2 etc. should be mentioned

against the name column and estimated age should be mentioned as per appearance.

- The dead body will be kept inside a Plastic body bag with Zip and the information about the dead body will also be mentioned thereon.
- The dead bodies will then be handed over to the Civil authorities/GRP for medico legal procedure and final disposal.
- In case the disposal of dead bodies is delayed due to non availability of the relatives or due to any other reason, he will arrange for preservation of the dead bodies by arranging ice etc.
- He will arrange for final disposal of the dead bodies by providing foldable coffins / wooden coffins from the Sub Divisional Hospitals on a need basis which are available in mortuary of Sub Divisional Railway Hospital.

DUTIES OF DOCTORS VISITING VARIOUS HOSPITALS WHERE INJURED PERSONS ARE ADMITTED/DEAD BODIES ARE LYING.

- Before leaving the accident site, they will note down the DOT/Railway/Mobile Phone numbers of the Nodal Officer and other Medical officers available at the accident site.
- In case railway vehicle/Ambulance is not available, they will hire private road vehicles to visit various hospitals. Doctors going to different hospitals will hire separate vehicles for their movement.
- On reaching the hospital, they will prepare a list of injured/dead and relay the same to the Nodal Officer available at the accident site.
- They will monitor the progress of the injured persons and arrange for their transportation to bigger hospitals with better facilities on a need basis.
- They will coordinate with the doctors of the respective hospitals in providing proper treatment and settlement of the bills at the time of discharge.
- They will remain at the hospital for briefing the VIP's visiting these hospitals.
- They will also coordinate with the officials of the Commercial/ Personnel Department for arranging ex-gratia payment to the accident victims.

DUTIES OF DOCTORS INVOLVED IN RESCUE OPERATION :

- They will arrange for an Ambulance / other suitable transport immediately, in advance, to transport injured persons.
- They will provide preliminary treatment to the injured and hand over the dead bodies to the doctor in-charge of the dead bodies.
- They will pass on the detailed information about the injured persons to the doctor preparing the list of injured persons.
- They will arrange to transport the injured persons to the nearby Railway/Govt. / Private Hospitals.
- A detailed search operation will be conducted by them at the accident site to look for any injured persons/ dead bodies trapped inside the bath rooms/ under debris etc. The search operation will be repeated before the medical team finally leaves the accident site.

DUTIES OF TEAM 'B' :

- They will establish Emergency cells in ACMS's chamber and Casualty of the Sub Divisional Railway Hospital where Railway telephone, P&T telephone, Fax Machine & computer is available to look into section wise Data base of medical facilities available along the track.
- They will communicate with adjacent Divisions (including Divisions of other Zones) to send Medical teams to the accident site, if the nature and magnitude of the accident warrant it.
- They will contact the local Railway/Govt./Private Hospitals near the accident site to be in

readiness to provide medical treatment to the injured persons.

- They will contact and arrange to send more medical teams, St. John Ambulance members, Bharat Scout & Guide Volunteers, Civil Defense members and other Railway / non Railway volunteers to the accident site on a need basis.
- They will establish close communication with the Divisional Control and the Nodal Officer at the accident site & leader of Team A-2 for regular exchange of information.
- They will keep the Sub Divisional Hospital in readiness including operation theatre, to receive and provide medical treatment to the injured persons. They will also intimate the nearby Govt./Private Hospitals and blood banks for this purpose.
- They will arrange to transport wooden / foldable coffin boxes to the accident site on receipt of requisition from the accident site.
- Dr. Anurag Goyal will move to Sub Divisional Hospital office and also monitor work of Hospital.

SETTING UP OF EMERGENCY CELL

- Emergency cell shall be opened in Divisional control office immediately after receipt of the information about disaster. ADRM will be the overall in charge of the cell and will function as an Emergency Officer for the purpose of managing the relief and restoration operation.
- The Emergency cell will be manned by JAG officers in shift duty round the clock. After the relief and rescue work completed, winding up of the cell shall be decided by DRM.
- Specific duties to be performed by Emergency Cell.

The Emergency Officer on duty will arrange for chronologically record of all informations and instructions received from or given to site of accident and Head Quarters in logbook.

REGULATION OF TRAINS

- Operating department of Divisional office in consultation with Headquarter office will arrange Regulation, Diversion and Termination of Passenger, Mail/Express as well as Goods trains; and will be advised to sister Divisions.
- Normally, Emergency cell should not directly deal with the Press and Electronic media.

ORDERING OF RELIEF ARRANGEMENTS

- On receipt of advice of an accident, the CTNL/CTNL(Punctuality) and on uncontrolled section, the SM of the Terminal station, shall order the Medical Van and/or Breakdown train / Tower Wagons as necessary. If necessary, assistance from adjoining Divisions/ Railways shall also be asked for through COIS mail by CTNL/CTNL (Punctuality).
- Sr.DME (nominated by DRM), in consultation with Sr.DOM, shall decide whether only

MFD (Tool van) is required to be sent to the accident site or the entire ART to be sent. In case of a difference of opinion between Sr.DME and Sr.DOM on this issue, DRM's decision shall be final CTNL/CTNL (Punctuality) shall be advised accordingly.

- With a view to ensure faster movement of MFD (Tool van) to the accident site, Sr.DME shall decide the mode of transport, i.e. by road or by rail.
- CTNL/CTNL (Punctuality) shall plan immediate arrangement of Loco and crew in consultation with Crew/Power controller for the movement of ARME/ART trains.

RELIEF AND RESCUE OPERATION

- Emergency cell at Divisional office will monitor the movement of Medical Relief Trains, Accident Relief Train, Breakdown Cranes and Labour and Material specials to the site of accident.
- In case, Medical Relief Train, Accident Relief Train, Breakdown Cranes are arranged from adjoining Railway or Division, the Emergency cell will monitor their movement.
- The requirement shall be requisitioned by the concerned officer of different department in Emergency cell to the Emergency officer or his nominated officers.
- Arrangement of wagons for loading Engineering materials, for movement of labour and any other resources as required for the site of accident shall be made by the Engineering branch to the Emergency officer and their movement to the site will be arranged by the Emergency cell.
- Similarly, on demand by Mechanical branch, ARTs and other Breakdown material will be moved from the adjoining Division/Railway.
- On demand by Medical branch any special trains for movement of injured passengers, the same shall be arranged by Emergency cell. The Commercial branch will place demand of special trains for movement of relatives and survivors from and to the site of accident. When such movement is arranged, the Commercial branch will advise public directly.
- Assistance from Defence, Navy, State Governments should be coordinated by the Emergency cell, where required. BSNL Phone no. are in Annexure-A

DIVERSION / CANCELLATION OF PASSENGER TRAINS

- Diversion/Cancellation and short Termination of passenger trains will be done by the Emergency cell in consultation with Headquarter office.
- Running of passenger specials for carrying relatives to the site of accident for carrying the survivors from the site of accident will be arranged and closely monitored by the Emergency Cell.
- Movement of Relief special trains for CRB/GM/DRM and other Branch officers and staff for the site of accident as required, should be arranged promptly and its running should be monitored closely.

ARRANGEMENT At SITE

In view of the requirement of shunting etc. the site and at adjoining stations, Traffic Inspectors should also be deployed round the clock in shifts at site and at adjoining stations, they will work in consultation with Emergency cell and Officer-in charge at site.

❖❖❖

ROLE OF PERSONNEL OFFICERS AND SUPERVISORS

As and when information is received regarding train accident involving injury to Railway men, the nominated Personnel Inspector in consultation with DPO/Sr.DPO will plan for action.

1. He will take the list of injured Railway men, will coordinate for providing necessary medical facilities.
2. He will coordinate the arrangement required for transportation of the dead bodies of Railway men to their families/native place.
3. He will arrange necessary payment e.g. Funeral Advance, ex-gratia etc. to the family of the deceased Railway men.
1. He will visit the family of the injured /deceased Railway men for solace and any other help required.
2. He will coordinate with the Railway Officer at site for any other work assigned to him.

Duties of S&T Officers and Supervisors during Disaster

On Duty TCI/Test room

1. Immediately after getting information about any disaster, TCI/Test-room will first take preliminary information of location, nature of disaster, movement of ART/ARME, etc. then they will inform all concerned S&T officers & SSE/Tele/Test room.
2. TCI / Test room will ensure that nominated ART/ARME staff moves by ART/ARME. SSE/ Tele/Test room should immediately reach Test room.
3. TCI /Test-room will inform to concerned S&T supervisors, to reach at site by first available means. After that they will collect the details of the disaster including involvement of S&T equipment, extent of damage, effect on Train operation etc. and will keep informing concerned S&T officials.
4. Separate register should be kept for "Disaster Management" in Test room and all developments with timing should be recorded in this register by on duty supervisor.
5. On duty supervisor in Test room shall coordinate with other departmental and divisional controls for assistance required and sharing information.
6. He will assist the field staff in testing of communication channels and in case of any communication failure, he will ensure that back up arrangement is in place immediately and fault is removed as soon as possible.

Sectional Staff (Telecom):

1. On getting the information about the disaster the concerned sectional supervisors will immediately move towards the site by first available means along with staff and tools.
2. Immediately on reaching the site the sectional supervisors will give information to Test room.
3. After reaching the site the telecom staff will immediately make arrangements for provision of emergency communication including portable emergency control phone and satellite phone. After providing these, the concerned staff will immediately inform Test-room.
4. Subsequently the Telecom staff will also make necessary arrangements for provision of Railway and BSNL telephones at site. For this the BSNL telephone of the nearest station can be extended to the site or though Auto dialler.
5. The Telecom staff should take necessary precaution for preserving all evidence and record joint observations of Telecom gears with available Operating, Engineering, Mechanical supervisors.
6. The gears affected by the disaster should immediately be suspended by the concerned supervisor and will be handed over for operation only after restoration and complete testing to avoid the possibility of any unsafe side failure.
7. Thereafter the Telecom supervisors will assess the damage to Telecom equipment and prepare a list of material required for restoration. This list should be repeated to TCI/Test room.
8. The restoration work should be started immediately after taking joint observation with the material available at site.
9. The walkie talkie sets available in ART/ARME should be issued to the Railway staff at site as per request of concerned officers. Personal acknowledgement of the concerned staff/officer for each walkie talkie set should be taken in the register available in ART/ARME. It will be the personal responsibility of the concerned staff to return the set after restoration.
10. All supervisors and officers at site should keep on informing the control about the developments at site at frequent intervals.

On Duty SI/Control

1. Immediately after getting information about any disaster, SI/CTO will first take preliminary information of location, nature of disaster, movement of ART/ARME, etc. then they will inform all concerned S&T officers SSE (Sig) Control.
2. SSE (Sig) Control should immediately reach Control office.
3. SI/CTO will inform to concerned S&T supervisors, to reach at site by first available means. After that they will collect the details of the disaster including involvement of S&T equipment, extent of damage, effect on Train operation etc. and will keep informing concerned S&T officials.
4. Separate register should be kept for "Disaster Management" in SI/CTO and all developments with timing should be recorded in this register by on duty supervisors.
5. SI/Data logger to be called immediately to control and data logger reports taken out.
6. On duty supervisor in SI/Control shall coordinate with other departmental and divisional controls for assistance required and sharing information.

Sectional Staff (Signaling):

1. On getting the information about the disaster the concerned sectional supervisors will immediately move towards the site by first available means along with staff and tools.
2. Immediately on reaching the site the sectional supervisor will give information to SI/Control.
3. Signaling staff should take necessary precautions for preserving all evidence immediately. With available Operating, Engineering, Mechanical supervisors, joint observation of panel position, Block instrument position, Panel counter readings, site condition etc. should be taken by signaling supervisors immediately after reaching the site. Any and all unusual should be noted down in the joint observations. The operation of signaling gears should be done only after joint observations have been taken.
4. The gears affected by the disaster should immediately be suspended by the concerned supervisor and will be handed over for operation only after restoration and complete testing to avoid the possibility of any unsafe side failure.
5. Thereafter the Signal supervisors will assess the damage to Signalling equipment and prepare a list of material required for restoration. This list should be repeated to SI Control.
6. The restoration work should be started immediately after taking joint observation with the material available at site.
7. All supervisors and officers at site should keep on informing the control about the developments at site at frequent intervals.

Nominated S&T Officers in Control Office:

1. The nominated officer in control office will arrange for the material required for restoration and will also make arrangements for transporting the material at site.
2. The nominated officer in Control office should keep on informing Sr.DSTE (Co), concerned Sr.DSTEs/DSTEs and Headquarters about the developments at site.
3. He will also ensure that all developments are recorded in the Disaster Management registers kept in SI/Control and Test room.
4. He will oversee the working of SI/Control and Test room and will provide necessary guidance to concerned control office & field staff.

Nominated S&T Officers at Site:

1. The sectional ADSTEs should immediately move to the site after getting information about the disaster.
2. They will also coordinate and ensure movement of concerned supervisors and staff to the site.
3. After reaching the site they will ensure recording of joint measurements at site and setting up of communication arrangements.
4. He will supervise the restoration work at site so as to restore the S&T gears in shortest possible time and with full safety.
5. All officers at site should keep on informing the control about the developments at site at frequent intervals.

Role/Duties of Safety Officers at an accident site vide R.B. letter No. 2017/Safety (DM)/Misc. Dated 30-01-2017

Check list for the Divisional Safety Officers Subsequent to an Accident

Immediately rush to the accident site by the first available means along with Safety Counselors.
Speak to Guard/Loco Pilot to understand the sequence of events and assess the extent of damages, the exact number of vehicles affected with their stenciled numbers. Also Guard may be asked to take pictures with their mobiles and sent them through whatsapp.
Arrange to rush the relief teams available with the Railways.
Check whether Station Masters on adjacent stations, Control and Medical staff have requisitioned for Local Medical help and Ambulances.
Seek assistance of NDRF and other Government/Non-Government Organizations if required.
Assess the site conditions and if needed order for additional rescue teams.
Establish a Unified Command Centre (UCC) and arrange to man it by a Safety Counselor.
Arrange to establish telephonic communication at the site.
Preserve all clues and evidences regarding probable cause of accident.
Arrange to record joint observations/measurements at the site by the senior subordinates.
Should check for any speed restriction at the location and any abnormality reported by previous train crew.

Arrange to maintain log of events at the site and relay to Divisional Emergency Cell at regular intervals.
Relay Prima Facie cause in consultation with Officer in-charge within a reasonable time.
Ensure that in UCC details of passengers admitted is maintained Hospital wise.
Relay probable restoration time in consultation with Officer in-charge within a reasonable time.
Arrange to create Accident ID in SIMS and update all the relevant fields at regular intervals.
Arrange for live feed through VSAT, collect aerial pictures of the accident and upload the photos /video in SIMS.

Chief Safety Officer shall ensure the following

Be in constant touch with divisional officers and Railway Board Emergency Cell. Shall ensure that above actions are carried out by divisional safety officers.
To seek for additional assistance from adjacent Railways and other Government/Non –Government agencies if needed.
Ensure that HQs emergency cell is manned by a Dy.CSO.
Ensure that all the details of the accident are conveyed to RB emergency cell hourly
Ensure that all the relevant details are filled up in the SIMS

Accident format for new SIMS website

Accident details :-

Date of accident		Time of accident	
Weather		Visibility	
Railway		Division	
Section		Station/bet. Stations	
Location of Accident (Station/Mid section)		Traction (Electrified/NE)	
Line type(DL/SL/TL)		Gauge type	
System of working		Route type	
Location (Km.)		Train type (Passenger/Other)	
Train no.		Engine no.	
Brief description of accident :-			
Officer at accident site:- AM NKJ			
Load & tonnage		Loco traction type (Diesel/Electric/Other)	
BPC details		Vehicle no. & type of vehicle	
Type of Accident i.e. Collision/Derailment etc.		Accident sub class i.e. A-1, A-2, A-3 etc.	
Accident category		State & District	
Section 113(Yes/No)		SPAD (Yes/No)	
Prima facie Cause of Accident:			
Remarks if any :-	---		

Casualty description

Type		**Killed**	**Grievous injury**	**Simple injury**
Passenger				
Railway staff				
Others	Road user			
	Other than road user

❖❖❖

1. Role of Security Department:-

- On receipt of any disaster information the nearest RPF Post will muster maximum available manpower within the shortest possible time and dispatch them to the scene of accident by first available means.
- Simultaneously the post/out post in charge would requisition additional manpower from adjoining RPF Posts.
- He should also pass on the information to local police and police control room, local fire brigade, Hospitals, Local voluntary organizations and the like at the earliest.
- Divisional security control will inform in-charge of the concerned post, Sr.DSC, ASC and Team 'A' of Divisional RPF Disaster Management team. Subsequently it will intimate Team 'B' and send them by ART. If they could not be sent by the ART then they should definitely be sent by the 2nd and 3rd Special trains carrying backup logistic support to the accident site, from each end. As per necessity will inform Civil Administration and Police control room and ZSCR.
- Additional RPF personnel from Zonal head quarter should be requisitioned and sent to accident site. ZSCR to be informed immediately about the incident.
- While sending reinforcement the divisional security control shall ensure that the necessary equipment required for rescue recovery and protection of the scene of incident are provided as follows:
    - Dragon search lights.
    - Nylon ropes and poles for segregating the affected area.
    - 2 loud speakers for making announcements.
    - Wireless sets for inter-communication in adequate nos.
    - Disaster Management Luminous Jacket.

2. Team-A

Nominated staff for Disaster Management (To move for disaster site) :-
